

JavaScript eval String.fromCharCode encoder

Cite as: Martin Paul Eve, "JavaScript eval String.fromCharCode encoder", *eve.gd: Martin Paul Eve*, May 15, 2007, <https://doi.org/10.59348/29wts-5q506>.

Here is a nice tool for encoding JavaScript into eval(String.fromCharCode(x,x,x)) format. A full HTML page is listed here, or you can try it out live at the bottom of this post.

```

<!DOCTYPE html PUBLIC "-//W3C//DTD XHTML 1.0 Transitional//EN"
"http://www.w3.org/TR/xhtml1/DTD/xhtml1-transitional.dtd">
<html>
<head>
    <title>Javascript Eval Encoder</title>
    <meta http-equiv="Content-Type" content="text/html; charset=iso-8859-1"/>
    <script type="text/javascript">
        function encode_to_javascript() {
            var input = document.getElementById('inputtext').value;

            var output = 'eval(String.fromCharCode(';

            for(pos = 0; pos < input.length; pos++) {
                output += input.charCodeAt(pos);

                if(pos != (input.length - 1)) {
                    output += ",";
                }
            }

            output += '))';

            document.getElementById('result').innerHTML = output;
            return 0;
        }
    </script>
</head>
<body>
    <textarea id="inputtext" rows="10" cols="50"></textarea><br/>
    <input type="submit" value="Encode"
onclick="javascript:encode_to_javascript()"/>
    <br/><span id="result"></span>
</body>
</html>

```

```

alert('test');

```

Encode
