My first attempt at Python got a slot on the Ubuntu opportunistic developer slot. Check it out here:

<http://www.jonobacon.org/2010/03/06/the-grand-app-writing-challenge-submissions/>

Also, note, first post to posterous.

 [sshsplit's command-line help output in a terminal, listing its usage, output, hook and subprocess options](#)

 [The sshsplit graphical launcher window, with fields for listen host, port, binary, remote host and number of instances](#)
