

Handling 403 errors in BuddyPress's new_activity_comment

Today I had a weird problem. Our BuddyPress activity stream comments were just not working. When you clicked the reply icon, then typed a response and pressed “post”, it simply grayed out and never succeeded. I could see, in the logs, that there was a 403 Forbidden error being thrown.

I just debugged this and the answer is quite simple.

In your theme, somewhere, there should be a `/buddypress/activity/entry.php` file.

In there, you might have something like:

```
wp_nonce_field( 'new_activity_comment', '_wpnonce_new_activity_comment' );
```

This is wrong. Change it to:

```
wp_nonce_field( 'new_activity_comment', '_wpnonce_new_activity_comment_' .  
bp_get_activity_id() );
```

And all will be well.
