As is my custom, I am writing, for my own historical logging, to show what I read and wrote this year. This year I have been working at [Knowledge Commons](#), which has been a great environment with lovely people and a worthwhile project. It has meant that much of my time has been consumed with technical matters as is proper, but I did still manage to get up early in the morning and write.

Kidney stuff has continued to blight me this year. I continue to need a huge amount of dialysis every week, 32 hours or so at present. But doing this overnight means that my days are free and I can continue to work and enjoy the things that I do. The other real problem with kidney failure is the near constant nausea that you get as toxins accumulate in your body. But also dialysis causes nausea in itself. So it's a bit of a challenging situation in many ways.

Perhaps the highlight of 2025 for me was receiving the SHARP DeLong Prize for Book History from the Society of the History of Authorship, Reading and Publishing. This is a massive honour and makes me feel vindicated in my choices around my book, *Theses on the Metaphors of Digital Textual History*. I will be doing a special event with SHARP next year focusing on this book and I hope as many of you as possible can join me.

My Publications and Work in 2025

I also wanted to share a list of my own publications and other work from the past year.

As 2025 draws to a close, I’m also taking a moment to reflect on the books that I have read this year. It’s been a diverse reading experience, spanning contemporary fiction to analyses of technology and history. I also read a LOT of books about *Star Trek* for my work, PhD theses for examination/supervision, and other books that didn’t make this list of “reading for fun”.
