Fate, Time, and Language

An Essay on Free Will

David Foster Wallace

THE LATE NOVELIST'S LEGENDARY, UNPUBLISHED WORK REVEALS THE PHILOSOPHICAL FOUNDATIONS OF HIS CELEBRATED FICTION.

Long before he published *Infinite Jest*, David Foster Wallace wrote a brilliant critique of Richard Taylor's argument for fatalism. In 1962, Taylor used six commonly-accepted philosophical presuppositions to imply that humans have no control over the future. Not only did Wallace take issue with Taylor's method, which, according to him, scrambled the relations of logic, language, and the physical world, but he also called out a semantic flaw that lie at the heart of Taylor's argument.

Wallace was a great skeptic of abstract thinking as a negation of something more genuine and real. He was especially suspicious of certain theoretical paradigms—the cerebral aestheticism of modernism, the clever gimmickry of postmodernism—that abandoned “the very old traditional human verities that have to do with spirituality and emotion and community.” As Wallace rises up to meet the challenge of Taylor (not to mention a number of other philosophical heavyweights), we watch the perspective of a major novelist develop, along with a lifelong struggle to find solid ground for his soaring convictions. This volume reproduces Taylor's original article and other works on fatalism cited by Wallace in his critique. James Ryerson, an editor at the *New York Times Magazine*, draws parallels in his introduction between Wallace's philosophy and fiction.

DAVID FOSTER WALLACE (1962–2008) wrote the acclaimed novels *Infinite Jest* and *The Broom of the System* and the story collections *Oblivion*, *Brief Interviews with Hideous Men*, and *Girl with Curious Hair*. His nonfiction includes the essay collections *Consider the Lobster* and *A Supposedly Fun Thing I'll Never Do Again*, and the full-length work *Everything and More*.

"The real accomplishment of this work is not technical or argumentative but more like a moral victory. David Foster Wallace's intellectual powers have been used to set aright a world momentarily upended by an intellectual sleight of hand. He enlists clinical argument in defense of passionate intuition. He restores logic and language to their rightful places."—from the Introduction by James Ryerson

The Preparation of the Novel

Lecture Course at the Collège de France (1978–1979)

Roland Barthes

Translated by Kate Briggs

THE THEORIST SHARES HIS DESIRE TO DISCOVER A NEW WAY OF WRITING AND, CONSEQUENTLY, A NEW WAY OF LIFE.

Completed just weeks before his death, these lectures mark a critical juncture in the career of Roland Barthes, declaring the intention, deeply felt, to compose a novel through an entirely untested method of writing. Unfolding over the course of two years, Barthes engaged in a unique pedagogical experiment: he would combine teaching and writing to “simulate” the creation of a novel, exploring every step of the collaborative process along the way.

Barthes’s lectures move from the inception of an idea and the need to write *something* to the actual decision making, planning, and material act of producing a book. He meets the difficulty of transitioning from short, concise expressions (exemplified by his favorite literary form, haiku) to longer, uninterrupted flows of narrative, and he encounters a number of trials and setbacks. Barthes takes solace in a diverse group of writers, including Dante, whose own opus was similarly inspired by the death of a loved one. He also turns to classical philosophy and Taoism and the works of Chateaubriand, Flaubert, Kafka, and Proust. This volume includes eight elliptical plans for Barthes’s unwritten novel and notes that shed light on the critic’s view of photography. Along with Columbia University Press’s *The Neutral: Lecture Course at the College de France* (1977–1978) and a third forthcoming collection of Barthes lectures, this volume completes a profound exploration into the labor and love of writing.

ROLAND BARTHES (1915–1980) was one of the most influential critics and philosophers of the twentieth century. His works include *Mythologies*, *S/Z*, *A Lover’s Discourse*, and *Camera Lucida*.

KATE BRIGGS is a scholar and translator based in Paris who has also translated the work of Michel Foucault.

PRAISE FOR ROLAND BARTHES:

“Roland Barthes repeatedly compared teaching to play, reading to eros, writing to seduction. His voice became more and more personal, more full of grain, as he called it; his intellectual art more openly a performance, like that of the other great anti-systematizers. . . . All of Barthes’s work is an exploration of the histrionic or ludic; in many ingenious modes, a plea for savor, for a festive (rather than dogmatic or credulous) relation to ideas. For Barthes, the point is to make us bold, agile, subtle, intelligent, detached. And to give pleasure.”—Susan Sontag

Hatred and Forgiveness

Julia Kristeva

Translated by Jeanine Herman

THE PROVOCATIVE INTELLECTUAL REFRACTS THE IMPULSE TO HATE THROUGH THE PRISM OF PSYCHO-ANALYSIS AND TEXT.

Dividing her essays into worlds, women, psychoanalysis, religion, portraits, and writing, Julia Kristeva explores the phenomenon of hate (and our attempts to subvert, sublimate, and otherwise process the emotion) through key texts and contexts. Her inquiry spans the themes, topics, and figures that have been central to her writing over the past three decades, and her paths of discovery advance the theoretical innovations that are so characteristic of her thought.

Kristeva rearticulates and extends her analysis of language, abjection, idealization, female sexuality, love, and forgiveness. She examines the “maladies of the soul,” utilizing the ailments of her patients (fatigue, irritability, and general malaise), the Bible, and texts by Marguerite Duras, St. Teresa of Avila, Roland Barthes, Simone de Beauvoir, and Georgia O’Keefe. Kristeva balances political calamity and individual pathology, addressing internal and external catastrophes, and global and personal injuries, and she confronts the nature of depression, obliviousness, fear, and the agony of being and nothingness. Psychoanalysis remains the key to serenity, with its turning back, looking back, investigation of the self, and refashioning of psychical damage into something useful or beautiful. Constant questioning, Kristeva contends, is essential to achieving a coming to terms.

JULIA KRISTEVA is professor of linguistics at the Université de Paris VII and author of *This Incredible Need to Believe*, *Murder in Byzantium*, *Strangers to Ourselves*, *New Maladies of the Soul*, *Time and Sense*, *Hannah Arendt*, and *Melanie Klein*. She is the recipient of the Hannah Arendt Prize for Political Thought and the Holberg International Memorial Prize.

JEANINE HERMAN is the translator of Julia Kristeva’s *The Powers and Limits of Psychoanalysis*.

PRAISE FOR JULIA KRISTEVA:

“Julia Kristeva changes the order of things: she always destroys the latest preconception, the one we thought we could be comforted by, the one of which we could be proud: what she displaces is the already-said, that is to say, the insistence of the signified; what she subverts is the authority of monologic science and of filiation.”—Roland Barthes

The Best American Magazine Writing 2010

Compiled by The American Society of Magazine Editors

Introduction by Jon Meacham

“Balanced, comprehensive, thought-provoking, involving, and well-crafted.”—*Library Journal*

The Best American Magazine Writing 2010 is the strongest evidence yet that the narrative and purpose of print journalism is as vital as ever, providing entertainment, connection, perspective, and unprecedented revelation in increasingly imaginative and engaging ways. This year’s selections, chosen from among the finalists of the National Magazine Awards, include **David Grann’s** much-discussed article on the legal execution of a possibly innocent man in the *New Yorker*; **Shari Fink’s** report on alleged euthanization of patients during Hurricane Katrina in the *New York Times Magazine*; and **John H. Richardson’s** widely read feature on America’s last late-term-abortion doctor in *Esquire*.

The Best American Magazine Writing 2010 continues to thrill with its captivating profiles, absorbing personal essays, amusing encounters, and entrancing fiction. **Jonathan Van Meter** offers rare access to one of literature’s most enigmatic marriages in *New York*; **Daphne Merkin** recounts her harrowing experience with chronic depression in the *New York Times Magazine*; **John Spong** recalls a colorful night at a Texas dance hall in *Texas Monthly*; and **Mitch Albom** rediscovers the spirit of Detroit in its devotion to athletics in *Sports Illustrated*. **James Stewart**, **Michael Lewis**, **Megan McArdle**, and **Bryan Burrough** conduct stellar coverage of the year’s financial issues, and **Michael Pollan** and **Atul Gawande** contribute fascinating pieces on health and health care reform. **Salman Rushdie**, **George Saunders**, and **Anthony Doerr** are among the nominated short story writers.

THE AMERICAN SOCIETY OF MAGAZINE EDITORS (ASME) is a non-profit professional organization for editors of print and online magazines edited, published, and distributed in the United States.

Cheese, Pears, and History in a Proverb

Massimo Montanari

Translated by Beth A. Brombert

A WORLD RENOWNED HISTORIAN OF FOOD AND THE MIDDLE AGES EXAMINES THE POWER OF LANGUAGE TO SHAPE A SOCIAL TRUTH.

“Do not let the peasant know how good cheese is with pears” goes the extremely well known yet hard to decipher saying. Intrigued by this proverb, which has endured since the Middle Ages, Massimo Montanari launches an adventurous history of its origins and utility.

Perusing archival cookbooks, agricultural and dietary treatises, literary works, and anthologies of beloved proverbs, Montanari finds in the nobility's demanding palettes and delicate stomachs a deep love of cheese with pears from medieval times onward. At first, cheese and its visceral, earthy pleasures was treated as the food of Polyphemus, the uncivilized man-beast. The pear, on the other hand, became the symbol of ephemeral, luxuriant pleasure—the indulgence of the social elite. Joined together, cheese and pears embodied an exclusive *savoir faire*, especially as the notion of taste as a natural phenomenon evolved into a cultural attitude. Montanari's delectable history straddles the line between written and oral tradition, between economic and social relations, and it thrills in the vivid power of mental representation. He ultimately discovers that the ambiguous proverb, so wrapped up in history, is not a repository of shared wisdom but a rich locus of social conflict.

MASSIMO MONTANARI is professor of medieval history and the history of food at the Institute of Paleography and Medieval Studies, University of Bologna. He has authored and coauthored more than a dozen books, including *Food Is Culture*; *Italian Cuisine: A Cultural History*; *Food: A Culinary History*; and *Famine and Plenty: The History of Food in Europe*.

BETH A. BROMBERT is the author of *Edouard Manet: Rebel in a Frock Coat* and the critically acclaimed biography *Christina: Portraits of a Princess*.

DNA

A Graphic Guide to the Molecule that Shook the World

Israel Rosenfield, Edward Ziff,
and Borin Van Loon

A RICH DEPICTION OF DNA'S ONGOING SCIENTIFIC
AND SOCIAL REVOLUTION.

With humor, depth, and philosophical and historical insight, *DNA* reaches out to a wide range of readers with its graphic portrayal of a complicated science. Suitable for use in and out of the classroom, this volume covers DNA's many marvels, from its original discovery in 1869 to early-twentieth-century debates on the mechanisms of inheritance and the deeper nature of life's evolution and variety.

Even readers who lack a background in science and philosophy will learn a tremendous amount from this engaging narrative. The book elucidates DNA's relationship to health and the cause and cure of disease. It also covers the creation of new life forms, nanomachines, and perspectives on crime detection, and considers the philosophical sources of classical Darwinian theory and recent, radical changes in the understanding of evolution itself. Borin Van Loon's humorous illustrations recount the contributions of Gregor Mendel, Frederick Griffith, James Watson, and Francis Crick, among other biologists, scientists, and researchers, and vividly depict the modern controversies surrounding the Human Genome Project and cloning.

ISRAEL ROSENFIELD teaches at the City University of New York. His books include *The Invention of Memory: A New View of the Brain* and *The Strange, Familiar, and Forgotten: An Anatomy of Consciousness*.

EDWARD ZIFF is professor of biochemistry and neural science at the New York University School of Medicine. With Israel Rosenfield, he has written about evolution and the brain for the *New York Review of Books*.

BORIN VAN LOON has been a freelance illustrator since 1977 and has designed and illustrated fifteen documentary comic books.

PRaise for the PREVIOUS EDITION:

With public fears of genetic engineering receding, scientists considered applying cloning to biotechnology. Biotechnology is the commercialization of biology and genetics. It is the application of new genetic technology to practical medical and industrial problems. Biotechnology arose in San Francisco, not far from the Silicon Valley, where investors gained great returns from the transistor, micro-chip, and computer industries.

The first projects were to transfer the genes for medically important proteins such as growth hormone or insulin to bacteria where the proteins might be cheaply produced in abundance.

Diagnosis: Schizophrenia

A Comprehensive Resource for Consumers, Families, and Helping Professionals
Second Edition

Rachel Miller and Susan E. Mason

"An excellent guide for patients and their families."—*Library Journal* (starred review)

Thirty-five young, recently diagnosed patients speak about schizophrenia and the process of recovery, while two specialists illuminate the medical science, psychoeducation, and therapeutic needs of those coping with the illness, as well as access to medical benefits and community resources. A remarkably inclusive guide, this volume informs patients, families, friends, and professionals, detailing the possible causes of schizophrenia, medications and side effects, the functioning of the brain, and the value of rehabilitation and other services.

"Incorporates new information on the brain, genetic issues, medication management, treatment, and coping with symptoms and problems. No other book offers such comprehensive coverage in a style that intertwines stories with research. It provides individuals, family members, and friends with a comprehensive and useful resource. Social workers, counselors, physicians, nurses, psychologists, and students in these professions will also find this invaluable for quick information that can easily be shared with patients and their families."—Shelly A. Wiechelt, University of Maryland, School of Social Work

Participants confront shame, stigma, substance use, and relapse issues and the necessity of healthy eating, safe sex practices, and coping skills during recovery. Clinicians elaborate on the symptoms of schizophrenia, such as violent and suicidal thoughts, delusions, hallucinations, memory and concentration problems, trouble getting motivated or organized, and anxiety and mood disorders. Adopting an uplifting tone of manageability, participants, authors, and clinicians offer more than advice—they prescribe hope.

"Far easier to understand than the classic title for [people with schizophrenia] and their families."—*Publishers Weekly*

"Very approachable and offers practical advice on managing symptoms of schizophrenia on a day-to-day basis and in different aspects of life, much needed by people moving toward mental health recovery."—Fang-pei Chen, Columbia University School of Social Work

Vaccines and Your Child

Separating Fact from Fiction

Paul A. Offit, M.D., and Charlotte A. Moser

FINALLY, A CONCISE, TRUSTWORTHY GUIDE THAT CUTS THROUGH THE CONFUSION AND MISINFORMATION ABOUT VACCINES.

Paul A. Offit, M.D., and Charlotte A. Moser, leading advocates for modern vaccines, answer parents' numerous questions about the underlying science of modern vaccines and the value of childhood immunization. While forthrightly addressing parents' concerns about vaccine safety, the authors explain how vaccines work, how they are made, and what goes into their making, as well as real risks, balanced against the danger of childhood infectious diseases and the threat of diseases that have reemerged due to declining childhood vaccination rates.

Offit and Moser address fears that children may receive too many vaccines too early. They consider the evidence that the HPV vaccine may cause chronic fatigue or other dangerous side effects, and they lay to rest any worries that additives and preservatives in vaccines cause autism. The authors warn against complacency and a false sense of security or the notion that a disease is too remote to do a child serious harm. There couldn't be a better moment—or a more pressing need—for a book that offers honesty, not hype, about protecting children's health.

PAUL A. OFFIT, M.D. is the chief of Infectious Diseases and the director of the Vaccine Education Center at the Children's Hospital of Philadelphia, as well as the Maurice R. Hilleman Professor of Vaccinology and professor of pediatrics at the University of Pennsylvania School of Medicine. In addition to *Autism's False Prophets*, he has authored *Vaccinated: One Man's Quest to Defeat the World's Deadliest Diseases* and *The Cutter Incident: How America's First Polio Vaccine Led to the Growing Vaccine Crisis*.

CHARLOTTE A. MOSER is the assistant director of the Vaccine Education Center at the Children's Hospital of Philadelphia and creator of the center's program for parents, known as Parents PACK. She has developed a variety of educational materials about vaccines, oversees the center's Web content and contact center, and writes the e-mail newsletter for Parents PACK, which has several thousand subscribers.

Truth, Errors, and Lies

Politics and Economics in a Volatile World

Grzegorz W. Kolodko

“Grzegorz W. Kolodko is one of the most acute observers of the international economy, based on his long experience as both a practitioner and an academic. Kolodko’s writings are always an important starting point for debate and discussion about the political economy of globalization.”—Francis Fukuyama, author of *The End of History*

Grzegorz W. Kolodko, one of the world’s leading authorities on economics and development policy, predicted our global economic crisis. In this book, he applies his far-reaching expertise to the past and future of the world economy.

Deploying a novel mix of scientific evaluation and personal observation, Kolodko begins with a brief discussion of misinformation and its perpetuation in economics and politics. He criticizes the simplification of complex economic issues and investigates the link between developments in the global economy and cultural change, scientific discoveries, and political fluctuations. Underscoring the necessity of conceptual and theoretical innovation, Kolodko offers a provocative study of globalization and the possibility of coming out ahead in an era of worldwide interdependence. Deeply critical of neoliberalism, which sought to transfer economic control exclusively to the private sector, Kolodko explores the virtues of social-economic development and the new rules of the economic game. A website will complement the book, www.volatileworld.net

“Grzegorz W. Kolodko has been an important player in the transition of the Polish economy and has wide experience and original insights into themes and trends in the international economy.

Every reader with an interest in economic development can benefit from reading this book.”—Robert A. Mundell, Nobel laureate in economic sciences

“Thanks to the successful marriage of economics, history, sociology, politics, and literature, *Truth, Errors, and Lies* is light reading but not devoid of theoretical gravity, ideal for the beach and, at the same time, just right for a university seminar.”—*Le Monde Diplomatique*

“Distills the lessons for development learned during a whole life of work and observations by a thinker and practitioner of economic transition and real-world politics” —Justin Yifu Lin, chief economist and senior vice president, World Bank

Terror, Religion, and Liberal Thought

Richard B. Miller

ESTABLISHING AN ETHICS THROUGH WHICH THE
TOLERANT CAN ACCEPT THE INTOLERANT, EVEN IF
EXTREME AND VIOLENT.

Religious violence may trigger feelings of repulsion and indignation, especially in a society that encourages toleration and respect, but rejection contradicts the very principles of inclusion that define a democracy and its core moral values. How are we to think ethically about religious violence and terrorism, especially in the wake of an atrocity such as 9/11?

Known for his skillful interrogation of ethical issues pertaining to religion, politics, and culture, Richard B. Miller returns to the basic tenets of liberalism to divine an ethical response to extremism. He questions how we are to think about the claims and aspirations of political religions that conflict so deeply with liberal norms and practices, and he suggests how liberal critics can speak in ways that respect cultural and religious difference. Miller explores other concerns within these investigations as well, such as the protection of human rights and a liberal democratic commitment to multicultural politics. As he relates religion and ethics, Miller presents a new lens through which we can view political religions and their moral responsibilities. His probing queries also force us to rethink our response to 9/11.

"A judicious application of the liberal tradition to thinking through a moral evaluation of and response to 9/11 and intercultural critique. Both are significantly informed by robust and nuanced understandings of respect for persons, toleration, and equality in a multicultural world, as well as human rights."—Sumner Twiss, Florida State University

RICHARD B. MILLER is director for the Poynter Center for the Study of Ethics and American Institutions and professor of religious studies at Indiana University. He is the author of *Interpretations of Conflict: Ethics, Pacifism, and the Just-War Tradition* and *Casuistry and Modern Ethics: A Poetics of Practical Reasoning*.

"An outstanding work. The discussion ranges widely and comfortably in diverse areas of scholarly inquiry. It is also a courageous work, neither apologetic nor ideological. It takes the basic, widely accepted, settled ideas of political liberalism, applies them to a particular historical context, and follows to clear and judicious conclusions."

The Power of Religion in the Public Sphere

Judith Butler, Jürgen Habermas, Charles Taylor, and Cornel West

Edited and Introduced by Eduardo Mendieta and Jonathan VanAntwerpen

Afterword by Craig Calhoun

FOUR MAJOR POLITICAL PHILOSOPHERS DISCUSS THE PLACE OF RELIGION IN SOCIETY, CULTURE, AND GOVERNMENT.

"The Power of Religion in the Public Sphere marks the event of a conversation among four of the world's leading public intellectuals on a subject that is one of the most important and widely discussed issues in contemporary theory and public policy. It is an exciting and original exchange that at once presses these figures to declare themselves on the proper place of religion in the public sphere and at the same time allows them to clarify their already significant contributions to the matter."—Jeffrey Robbins, Lebanon Valley College

The Power of Religion in the Public Sphere is a rare opportunity to experience how preeminent philosophers tackle one all-encompassing concern: what role does—or should—religion play in our public lives? Judith Butler's response reflects her recent work on state-sponsored violence in Israel, examining the function of religion within the context of cultural critique. Jürgen Habermas, best known for his innovative conception of the public sphere, explores the limits of secularism, the enduring importance of religion, and the political significance of religious tolerance. Charles Taylor takes stock of our post-Christendom Christianity and the need for a radical redefinition of secularism, and Cornel West passionately defends civil disobedience and emancipatory theology, especially in the service of civil rights and just opposition to war. In their introduction, Eduardo Mendieta and Jonathan VanAntwerpen detail the immense contribution of these philosophers to contemporary scholarship and, specifically, to the issues of direct concern to the volume. In an afterword, Craig Calhoun discusses the effect of these approaches on the national and international sphere.

JUDITH BUTLER is the Maxine Eliot Professor in the Department of Rhetoric and Comparative Literature at the University of California at Berkeley.

JÜRGEN HABERMAS is a German philosopher and sociologist and former director of the Institute for Social Research at the University of Frankfurt.

CHARLES TAYLOR is a Canadian philosopher and professor emeritus of political science and philosophy at McGill University.

An Ethics for Today

Finding Common Ground Between Philosophy and Religion

Richard Rorty

Introduction by Gianni Vattimo

THE LATE PHILOSOPHER BRIDGES SECULARISM AND SPIRITUALITY AND CONFRONTS THE CLAIM THAT RELATIVISM CHALLENGES SPIRITUAL AUTHORITY.

Richard Rorty is famous, maybe even infamous, for his philosophical nonchalance. His groundbreaking work not only rejects all theories of truth but also dismisses modern epistemology and its preoccupation with knowledge and representation. At the same time, the celebrated pragmatist believed moral questions did not have universally valid answers, leading to a complex view of religion rarely expressed in his writings.

In this posthumous publication, Rorty, a strict secularist, finds in the pragmatic thought of John Dewey, John Stuart Mill, Henry James, and George Santayana a political imagination shared by many religious traditions. His intent is not to promote belief over nonbelief, or to blur the distinction between religious and public domains, but to locate patterns of similarity and difference for an ethics of decency and a politics of solidarity. He particularly responds to Pope Benedict XVI and his campaign against postmodern inquiry. Whether holding theologians, metaphysicians, or political ideologues to account, Rorty remains steadfast in his opposition to absolute uniformity and its exploitation of political strength.

"Richard Rorty's argument rather clearly and succinctly brings the claims of pragmatism to issues at the heart of Catholic politics—a clash between relativism and fundamentalism that is in many ways emblematic of the larger struggles between religious and secular traditions across the globe."—Robert T. Valgenti, Lebanon Valley College

RICHARD RORTY (1931–2007) was professor of comparative literature and philosophy at Stanford University.

GIANNI VATTIMO is emeritus professor of philosophy at the University of Turin and a member of the European Parliament.

"Contrary to Richard Rorty's previous writings on religion, this book engages in a critical debate with the dogmatic and metaphysical affirmations of Pope Benedict XVI on human nature, relativism, and homosexuality. Commenting on John Stuart Mill, George Santayana, Martin Heidegger, John Dewey, Jürgen Habermas, and Peter Singer's progressive philosophies, Rorty shows how the pope belongs to those fundamentalist intellectuals who still believe that truth is greater than any other value, including democracy."—Santiago Zabala, Johns Hopkins University

Democracy in What State?

Giorgio Agamben, Alain Badiou, Daniel Bensaid, Wendy Brown, Jean-Luc Nancy, Jacques Rancière, Kristin Ross, and Slavoj Žižek

Translated by William McCuaig

A MONUMENTAL COLLABORATION AMONG THE
WORLD'S TOP PHILOSOPHERS ON THE NATURE AND
PURPOSE OF CONTEMPORARY DEMOCRACY.

"Is it meaningful, as far as you are concerned, to call oneself a democrat? And if so, how do you interpret the word?" In responding to this question, eight iconoclastic thinkers prove the rich potential of democracy and its critical weaknesses. They also reconceive the practice for new political and cultural realities. Giorgio Agamben traces the history of constitutions and their coexistence with various governments. Alain Badiou contrasts current democratic practice with democratic communism. Daniel Bensaid ponders the institutionalization of democracy, while Wendy Brown discusses the democratization of society under neoliberalism. Jean-Luc Nancy measures the difference between democracy as a form of rule and as a human end, while Jacques Rancière highlights its egalitarian nature. Kristin Ross identifies hierarchical relationships within democratic practice, and Slavoj Žižek complicates the distinction between desiring to own the state and hoping to do without it.

"This collection is an extremely significant contribution to the critical debate on the current state of world politics and, more specifically, the role of the term 'democracy' in political theory and practice. It includes invited contributions and interviews with a battery of intellectuals who possess a rare conceptual pedigree, including some of the most well-known living European philosophers, and the welcome contribution of two renowned American intellectuals."—Gabriel Rockhill, Villanova University

The Responsibility of the Philosopher

Gianni Vattimo

Edited by Franca D'Agostini

Translated by William McCuaig

THE POPULAR PHILOSOPHER, MEMOIRIST, AND POLITICAL FIGURE INTRODUCES READERS TO THE BREADTH OF HIS—AND THE PHILOSOPHER'S—WORK.

Over the course of his career, Gianni Vattimo has assumed a number of public and private identities and has pursued multiple intellectual paths. He seems to embody several contradictions, at once defending and questioning religion, critiquing and serving the state. Yet the diversity of his life and thought form the very essence of, as he sees it, the vocation and responsibility of the philosopher. In a world that desires quantifiable results and ideological expediency, the philosopher becomes the vital interpreter of the endlessly complex.

As he outlines his ideas about the philosopher's role, Vattimo builds an important companion to his life's work. He confronts questions concerning science, religion, logic, literature, and truth, and passionately defends the power of hermeneutics to engage with life's difficulties. He conjures a clear vision of philosophy as something separate from the sciences and the humanities but also intimately connected to their processes, and he reiterates a conception of truth that emphasizes fidelity and participation through dialogue.

GIANNI VATTIMO is emeritus professor of philosophy at the University of Turin and a member of the European Parliament. His books with Columbia University Press include *Christianity, Truth, and Weakening Faith: A Dialogue*; *Not Being God*; *The Future of Religion* (with Richard Rorty); *Dialogue with Nietzsche*; and *Nihilism and Emancipation*.

FRANCA D'AGOSTINI is professor of philosophy at the University of Turin.

"The Vocation and Responsibility of the Philosopher is brilliant and entertaining without becoming overly conceptual. The language is consistently rigorous, yet it is incredibly clear and accessible to a philosophically unsophisticated audience."—Silvia Benso, Rochester Institute of Technology

"One of Gianni Vattimo's most skilled students, Franca D'Agostini manages to present both the logic behind weak thought and the novelty of this text, which reveals the Italian master's intuitions on crucial problems of contemporary philosophy."—Santiago Zabala, author of *The Remains of Being: Hermeneutic Ontology After Metaphysics*

Craving Earth

Understanding Pica—the Urge to Eat Clay, Starch, Ice, and Chalk

Sera L. Young

ILLUMINATING AN ENIGMATIC BEHAVIOR DEEPLY
ENTWINED WITH HUMAN BIOLOGY AND CULTURE.

Humans have eaten earth, on purpose, for more than 2,300 years. They also crave starch, ice, chalk, and other unorthodox foods. Some even claim they would “go crazy” without these items, but why? What pleasure do they provide? What sensory messages do they send? What is the cultural significance of these cravings? What is their function in the body?

Sifting through extensive historical, ethnographic, and biomedical findings, Sera Young creates a portrait of pica, or non food cravings, from humans’ earliest ingestions to current trends and practices. In highly readable detail, she describes frequently consumed substances and the many methods (including the Internet) used to obtain them. She reveals how pica is remarkably prevalent (it occurs in nearly every human culture and throughout the animal kingdom), identifies its most avid partakers (pregnant women and young children), and describes the potentially healthful and harmful effects. In the second half of her book, Young evaluates the many hypotheses about the causes of pica, from the fantastical to the scientific, including hunger, nutritional deficiencies, and protective capacities. Never has a book examined pica so thoroughly or accessibly.

“The human focus of Sera Young’s book provides a welcome counterpoint to the strictly medical focus currently available in other sources.”—David L. Browman, Washington University in St. Louis

“Fascinating! Filled with both wit and keen scientific insight, Sera Young has written the landmark study of pica. It is sure to be a classic in anthropology and nutrition for a long time to come.”

Disaster Deferred

How New Science Is Changing Our View of Earthquake Hazards in the Midwest

Seth Stein

THE REAL SCIENCE BEHIND THE NEXT "BIG ONE"
SUPPOSED TO HIT THE MIDWEST.

In the winter of 1811–12, large earthquakes shook the Midwest along the New Madrid seismic zone that many have (mistakenly) believed to be the biggest to hit the United States. Today the federal government, acting on what they think to be sound science, ranks the hazard in the Midwest as high as California's and has pressured communities to undertake expensive preparations for disaster. Coinciding with the 200th anniversary of the New Madrid earthquakes, *Disaster Deferred* revisits this seismic event and the predictions of doom that have followed in its wake.

Geared toward a general audience, *Disaster Deferred* clearly explains the techniques seismologists use to study Midwestern quakes and estimate their danger. Detailing how limited scientific knowledge, bureaucratic instincts, and the media's love of a good story can exaggerate these hazards, Seth Stein calmly debunks the hype surrounding such prophecies and encourages the formulation of more sensible, less costly policy. Powered by insider knowledge and an engaging style, *Disaster Deferred* is an all-inclusive encounter with the principles of geology and modern technology, showing how new instruments, like the Global Positioning System, are painting a very different—and much less frightening—picture.

SETH STEIN is Deering Professor of Geological Sciences at Northwestern University and has been awarded the Macelwane Medal of the American Geophysical Union, the Woolard Award of the Geological Society of America, and the Mueller Medal of the European Geosciences Union. He is coauthor of the widely adopted textbook *An Introduction to Seismology, Earthquakes, and Earth Structure*.

"Seth Stein thoughtfully recognizes the painful decisions that various politicians and emergency managers must make, and he provides realistic descriptions of various types of bureaucracies and scientific specialties, without rancor. A must-read for all involved in such issues."—Orrin Pilkey, Duke University

"Seth Stein's book is fun to read and has a compelling story to tell. There is no book quite like this out there."

Capturing Carbon

The New Weapon in the War Against Climate Change

Robin M. Mills

THE POLITICS AND TECHNOLOGY BEHIND A RAPIDLY EVOLVING SCIENCE.

As amazing as it sounds, we now possess the technology to capture carbon emissions as they are released into the atmosphere. After capture, the gas is trapped within facilities hidden far underground. As promising as this process sounds, can it really compete with the often cheaper, low-carbon technologies that are currently available, and is the practice really safe and eco-friendly?

Capturing Carbon is one of the first texts to take a serious look at this issue, explaining the need for this new technology and describing in detail the components that make it work. Robin M. Mills, a long-time energy executive with a background in geology and economics, paints an accessible portrait of carbon capture's existing and projected technologies. He covers the specifics of geological storage and, interestingly, compares it to the biological sequestering of carbon occurring naturally in soils and forests. With a frank and unbiased analysis, Mills considers the costs of this process and its value in curbing climate change. He tackles the politics and policies that will help the technology take root, and he anticipates the public's reaction and opportunities for business. Mills also accounts for the risks of carbon capture, rounding out a definitive and all-encompassing volume for environmentalists, policymakers, investors, industry insiders, and anyone wishing to understand this new frontier.

ROBIN M. MILLS is the petroleum economics manager for the Emirates National Oil Company in Dubai and a former employee of Shell. He is a member of the International Association for Energy Economics and the Association of International Petroleum Negotiators.

Three Big Bangs

Matter-Energy, Life, Mind

Holmes Rolston III

MERGING PHILOSOPHY, COSMOLOGY, BIOLOGY, AND THEOLOGY INTO A NOVEL THEORY OF THE UNIVERSE.

Rational explanations of the universe leave the spiritually curious cold, and religiously based theories tend to devalue the findings of science. By dividing the creation of matter, life, energy, and the mind into three big bangs, Holmes Rolston III strikes a middle path between these two camps. He divines a history of the universe that respects both scientific discovery and an underlying intelligence.

In Rolston's first big bang, matter-energy appears, initially in simpler forms but with a remarkable capacity for generating heavier elements. The size and expansion rate of the universe; the nature of electromagnetism, gravity, and nuclear forces; and other cosmic features all enable the second big bang, the explosion of life on Earth. As DNA begins to discover, store, and transfer information, life endures to establish billions of species. Cognitive capacities escalate, and with neural sentience, the third big bang results: human genius. A massive singularity, the human mind gives birth to language and culture, increasing the brain's complexity and promoting the spread of ideas. Ideas generate ideals, which help life take on spirit. The nature of matter-energy and genes and their geneses encourage humans to wonder where they are, who they are, and what they should do. Rolston draws on a variety of fields as he studies the sacred order of this cybernetic system.

Securing The State

David Omand

PROTECTING THE PEOPLE WITHOUT COMPROMISING THEIR RIGHTS.

Governments recognize that the public depends on the certainty, however illusory, of living free from terrorism, war, or nuclear attack. They need to believe that the government can protect them from pandemics and climate change. Yet when political institutions fail to balance justice, liberty, privacy, and civic harmony in the pursuit of security, they jeopardize the very trust and confidence they hope to inspire. Drawing on decades of experience as a security analyst and political insider, David Omand argues that while public security is necessary for good government, the erosion of civil liberties, however slight, tips the balance in favor of bad government and creates an insecure state.

"David Omand's insight and experience are invaluable to anyone considering the necessary and important role of intelligence and security in national security challenges. Omand's thoughtful consideration, intellect, and knowledge of British Government has made him the perfect interlocutor in both calm and crisis."—Frances Fragos Townsend, White House Homeland Security Adviser to the President and Chair of the Homeland Security Council, 2004–2007

"A thoughtful, exceptionally well-informed book. Essential reading for anyone seriously interested in the role of intelligence in modern government."—John Scarlett, former director general of the British Secret Intelligence Service

DAVID OMAND is a former intelligence and security coordinator of the Cabinet Office for the government of the United Kingdom, responsible for the counterterrorism strategy, CONTEST. He has served for seven years as a member of the Joint Intelligence Committee, as permanent secretary of the Home Office, and as director of GCHQ, the U.K. equivalent of the United States's National Security Agency. War and War Crimes

James Gow

CALIBRATING THE ETHICS OF WAR WITHIN MODERN CONTEXTS AND AGAINST NEW TECHNOLOGIES.

Necessity and proportionality inform the laws of war, but how do these principles work in modern warfare? What new pressures do the practitioners of war face, especially in light of rapid strategy and policy changes and an increasing emphasis on ethics and legality?

Wars waged in fluctuating environments make the legitimacy of armed force hard to justify, especially among diverse international and transnational publics. More than ever, strategy has come to embrace justice and law as crucial components of military success, but legitimacy is fragile and easily contested, and today's militaries struggle to respond positively, consistently, and legally. Drawing on empirical research and interviews with seasoned military professionals, this volume describes how militaries can work successfully within the politics-law-strategy nexus to foster and maintain a sense of legitimacy in war. James Gow clearly defines the relationship between wars and their outcomes, pinpointing the moment when a war act becomes a war crime, especially within multidimensional combat. Taking an initial, bold step in reconciling this troubling and taboo issue, Gow provides strategists, policymakers, and others with a framework for mitigating negative outcomes.

JAMES GOW is professor of international peace and security at King's College, University of London. He is the author of *Triumph of the Lack of Will: International Diplomacy and the Yugoslav War* and *The Serbian Project and Its Adversaries: A Strategy of War Crimes*.

“War and War Crimes is a clever and fundamental book. Law and legitimacy have always been important to war, but James Gow brilliantly demonstrates how central the issue of not simply being ‘right’ but also ‘wrong’ has become to modern warfare.”

Apart

Alienated and Engaged Muslims in the West

Justin Gest

INVESTIGATING THE DAILY POLITICAL LIVES OF THE WEST'S MISUNDERSTOOD MUSLIM COMMUNITIES.

Through a novel conceptual framework and probing interviews, Justin Gest gets to the heart of why so many Western Muslims are disaffected by their social and political situations and why they undermine the very political systems that remain their means of inclusion. He also considers why so many other Western Muslims feel differently and why they choose to be engaged.

Based on research conducted in London's East End and Madrid's Lavapiés district, and drawing on over one hundred interviews with community elders, imams, extremists, politicians, gangsters, and ordinary people just trying to get by, Gest maps the daily experiences of young Muslim men. Confronting conventional explanations that point to inequality, discrimination, and religion, he builds a new theory that distinguishes alienated and engaged political behavior not by structural factors but by social agents and their interpretation of shared realities. Filled with counterintuitive conclusions, *Apart* sounds an unambiguous warning to Western policymakers, presaging an imminent American experience with the same challenges. The way in which governments and people discipline their fear and understand their Muslim fellows, it claims, may shape the course of democratic social life in the foreseeable future.

"Justin Gest's carefully researched and well-argued book brings fresh perspective to the question of Muslim alienation in Europe. His valuable methodological insights and judicious conclusions have a wide application."—Bhikhu Parekh, London School of Economics, author of *Rethinking Multiculturalism: Cultural Diversity and Political Theory*

"Justin Gest has written a thoughtful and compelling book on why some Muslims in the West feel disenchanting and angry with our political institutions while others do not. He offers a subtle account based on new theoretical work and original case studies. A major contribution by a new voice in academic debate."—David Held, London School of Economics

The New Muslim Brotherhood in the West

Lorenzo Vidino

A REMARKABLE ENCOUNTER WITH ONE OF THE MOST POWERFUL AND CONTROVERSIAL MUSLIM ORGANIZATIONS IN THE WEST.

In both Europe and North America, organizations tracing their origins back to the Muslim Brotherhood and other Islamist movements have rapidly evolved into multifunctional, richly funded organizations. They now compete to become the major representatives of Western Muslim communities and government interlocutors. Some analysts and policy makers see these organizations as positive forces encouraging integration. Others treat them as modern-day Trojan horses that feign moderation while radicalizing Western Muslims.

Lorenzo Vidino brokers a third and more informed view. Having completed more than a decade of research on political Islam in the West, Vidino is keenly qualified to analyze a movement that is as controversial as it is unknown. Conducting in-depth interviews on four continents and sourcing documents in ten languages, Vidino shares the history, methods, views, and goals of the Western Brothers, as well as their phenomenal growth. He then flips the perspective, examining the response to these groups by Western governments, concentrating specifically on Great Britain, Germany, and the United States. Highly informed and thoughtfully presented, Vidino's work sheds light on a critical juncture in Muslim-Western relations and the role Islam plays for a variety of uprooted individuals.

LORENZO VIDINO is a fellow with the International Security Program's Initiative on Religion in International Affairs at the Belfer Center, Kennedy School of Government, Harvard University. He is also a Peace Scholar at the U.S. Institute of Peace and author of the first book on al Qaeda in Europe, *Al Qaeda in Europe: The New Battleground of Global Jihad*.

"The New Muslim Brotherhood in the West contains a good deal of useful factual information and an informed and balanced analysis of the problems Western governments face in dealing with Muslim Brotherhood-linked organizations. This very important topic has yet to be given the attention it deserves, and Lorenzo Vidino's book fills that gap."—Jeffrey M. Bale, Monterey Institute of International Studies

East Asia Before the West

Five Centuries of Trade and Tribute

David C. Kang

A DISTINCTLY NON-WESTERN TAKE ON INTERNATIONAL RELATIONS AND AN INDISPENSABLE REINTERPRETATION OF ASIAN HISTORY AND POLITICS.

From the founding of the Ming dynasty in 1368 to the start of the Opium Wars in 1841, China has engaged in only two large-scale conflicts with its principal neighbors Korea, Vietnam, and Japan. These four territorial and centralized states have otherwise fostered peaceful and long-lasting relationships with one another, and as each has grown more powerful, the atmosphere around them has stabilized.

Focusing on the role of the “tribute system” in maintaining stability in East Asia and in fostering diplomatic and commercial exchange, Kang contrasts this history against the example of Europe and East Asian states’ skirmishes with nomadic peoples to the north and west. Although China has been the unquestioned hegemon in the region, with other political units considered second, the tributary order has entailed military, cultural, and economic dimensions that have afforded its participants immense latitude. Europe’s “Westphalian” system, on the other hand, has pursued formal equality among states and has balanced power politics, leading to incessant interstate conflict. Scholars tend to view Europe’s experience as universal, but Kang emphasizes East Asia’s formal hierarchy as an international system with its own history and character. This approach not only recasts our understanding of East Asian relations but also defines a model that applies to other hegemonies outside the European order.

“By researching the full range of China’s relationships, including Southeast Asia, Korea, and Japan, as well as nomadic troubles, David C. Kang balances the perspective of the whole regional picture. A remarkable achievement.”
—Brantly Womack, University of Virginia

Inside the Red Box

North Korea's Post-totalitarian Politics

Patrick McEachern

A STARTLING ACCOUNT OF HOW NORTH KOREA'S
RULING CLASS FORMS ITS CONTROVERSIAL POLICY.

Kim Jong-Il, North Korea's ruthless leader, doesn't rule by fiat. The individuals and institutions below him, at the very least, inform and execute strategic-level decisions and operational matters—according to their leader's wishes. Existing models of North Korean politics fail to account for the regime's processes of rule, making Kim's actions seem surprising or confusing when in fact they are easy to predict. A long-time specialist on North Korean affairs, Patrick McEachern maps the institutional pluralism that defines Kim's rule and preserves the structure of the state.

McEachern identifies three major institutions that operate under the Supreme Leader: the cabinet, the military, and the party. These groups are the first to debate and bargain policy, which is then delivered to Kim and his inner circle for a final decision. This mode of rule produces results that challenge traditional expectations, but North Korea does not follow a classic totalitarian, personalistic, or corporatist model. Rather than being monolithic, McEachern argues, the state is decentralized and post-totalitarian, and Kim can accept or reject the three options presented to him or pursue his own path. Authority may be centralized, but power itself remains diffuse. McEachern details how this process works and its uniqueness from the totalitarian methods of Kim's father, Kim Il Sung. His research is vital to understanding North Korea's reactive policy choices, which continue to bewilder the west.

PATRICK MCEACHERN is a foreign service officer and former North Korea analyst with the State Department's Bureau of Intelligence and Research and is slated to serve as working-level lead on Six-Party Talks issues at the U.S. embassy in Seoul.

"Inside the Red Box is a nuanced and meticulous study of the inner workings of the North Korean policy apparatus. It is a very useful addition to the literature, saying more about what happens inside the black box (or red box) beyond standard accounts and the personality cult of the Kim family."

From Mao to Market

China Reconfigured

Robin Porter

THE HISTORICAL AND CULTURAL FORCES BEHIND A REMARKABLE TRANSFORMATION THAT DEFIES PRECEDENT AND EXPECTATION.

Drawing on decades of research and teaching on China, Robin Porter presents a nuanced view of the country's modern evolution and its myriad historical influences. Porter has a wealth of practical experience with China, having first visited the country during the Cultural Revolution and having worked as an editor at the Xinhua News Agency during the 1970s. In this volume, he explicitly accounts for the factors that gave rise to China's current trends and behaviors, offering both scholars and newcomers a rich portrait of an unpredictable though formidable world power.

"From Mao to Market is a well-written and clearly organized study covering a number of important themes relating to contemporary Chinese development."

—Dylan Sutherland, University
of Nottingham

Porter begins with China's social and political development from earliest times to the modern period. He concludes with the country today, then steps back to assess the events that have most determined China's evolution. He concentrates on the role played by politics and culture in conditioning every aspect of Chinese life. His analysis considers the country's Confucian heritage, orthodoxy in ideology and law, political command structures, technological innovation, enterprise management, public policy and private goals, and the prospects for democracy. With personal insight and privileged perspective, Porter clarifies a number of myths and mysteries about modern China and evaluates the implications of its expansion in the balance of world power. He provides crucial context for the "China dimension" that has become so central to discussions of national and international policy.

ROBIN PORTER is a visiting professor at the Centre for East Asian Studies, Bristol University, and has taught courses on China at universities in Canada, Australia, and the United Kingdom. He was the British government's first science counselor in Beijing.

New Powers

How to Become One and How to Manage Them

Amrita Narlikar

HOW NATIONS CAN NEGOTIATE ADVANTAGE WHILE
MAINTAINING STABILITY IN A FLATTENING YET
FRACTIOUS WORLD.

Being new is never easy, especially in the anarchical world of international politics. New powers such as Brazil, China, and India must tread difficult terrain as they negotiate their way to the top, signaling sufficient conformity to diffuse tensions and avoid preemptive reprisals. Yet habitually conciliatory diplomacy can cast emerging states as lightweights and pushovers. Effective bargaining is therefore key to balancing these extremes.

Established powers also need straightforward solutions to pressing dilemmas. If the aims of a new power are limited, then engagement is a worthwhile enterprise. If its aims are radically revisionist or revolutionary, then established powers may have to contain it. Assessing the intentions of new powers and responding appropriately is crucial for the maintenance of international peace. In this enlightening study, Amrita Narlikar pinpoints the most successful negotiating strategies for rising powers. Focusing on three of the most important candidates now vying for international recognition—Brazil, China, and India—she underscores the commonalities in their diplomatic efforts and isolates the striking differences. Her study aids not only emerging players but also the established countries struggling with evolving balances of power.

AMRITA NARLIKAR is University Senior Lecturer at the Department of Politics and International Studies, University of Cambridge, and Official Fellow of Darwin College. Her most recent books are *Deadlocks in Multilateral Negotiations: Causes and Solutions* and *The World Trade Organization: A Very Short Introduction*.

“Tension and even warfare are likely when a new power emerges and an old power is challenged. The achievement of Amrita Narlikar is to bring analytical rigor to the recent emergence of India, China, and Brazil, and her insights are equally applicable to the historical past as to the present. Narlikar steers a deft course between the large-scale issues of the shifting balance of power and the details of negotiating style, which are so important in mediating the interests of established and new powers. She combines perceptive case studies with clear hypotheses to produce a major study of a question that was vital for our past and will be for our future.”—Martin Daunton, University of Cambridge

Social Ethics for Social Justice

Gary Dorrien

THE CELEBRATED SOCIAL ETHICIST LAUNCHES A NEW PLATFORM FOR PROGRESSIVE CHRISTIAN THOUGHT AND ACTION.

Sourcing the major traditions of progressive Christian social ethics—social gospel liberalism, Niebuhrian realism, and liberation theology—Gary Dorrien argues for the social-ethical necessity of social justice politics. In carefully reasoned essays, he focuses on three broad subjects: the ethics and politics of economic justice; racial and gender justice; and anti-militarism, and makes a constructive case for economic democracy, a liberationist understanding of racial and gender justice, and an anti-imperial form of liberal internationalism.

"Like Gary Dorrien's other works, this book is richly researched and beautifully written. Dorrien is among the leading academic voices of progressive Christianity, and his book brings the various threads of his scholarship together in one place."—Laura Olson, Clemson University

"Gary Dorrien is the preeminent social ethicist in North America today."
—Cornel West, Princeton University

In Dorrien's view, the three major discourse traditions of progressive Christian social ethics share a fundamental commitment to transform the structures of society in the direction of social justice. His reflections on these topics feature extensive and innovative analyses of major figures, such as Walter Rauschenbusch, Reinhold Niebuhr, James Burnham, Norman Thomas, and Michael Harrington, and contemporary intellectuals, such as Rosemary R. Ruether, Katie Cannon, Gregory Baum, and Cornel West. Dorrien also weaves his personal experiences into his narrative, especially his involvement in social justice movements. The volume features a special chapter on Dorrien's published work during the 2008 presidential campaign and historic candidacy of Barack Obama.

GARY DORRIEN is the Reinhold Niebuhr Professor of Social Ethics at Union Theological Seminary and professor of religion at Columbia University. His recent works include the three-volume *The Making of Liberal Theology* and *Social Ethics in the Making: Interpreting an American Tradition*.

The Animal Rights Debate

Abolition or Regulation?

Gary L. Francione and Robert Garner

HOW FAR SHOULD WE EXTEND RIGHTS AND PROTECTIONS FOR ANIMALS?

Gary L. Francione is a law professor and leading philosopher of animal-rights theory. Robert Garner is a political theorist specializing in the philosophy and politics of animal protection. Francione maintains that we have no moral justification for using nonhumans, arguing that because animals are property—economic commodities—laws or industry practices requiring “humane” treatment will, as a general matter, fail to provide any meaningful level of protection. Garner favors a version of animal rights that focuses on eliminating animal suffering and adopts a protectionist approach, maintaining that, although the traditional animal-welfare ethic is philosophically flawed, it can contribute strategically to the achievement of animal-rights ends.

As they spar, Francione and Garner deconstruct the animal-protection movement in the United States, the United Kingdom, Europe, and elsewhere, discussing the practices of organizations such as PETA, which joins with McDonald’s and other fast-food chains to “improve” the slaughter of animals. They also examine American and European laws and campaigns from both the rights and welfare perspectives, identifying weaknesses and strengths that give shape to future legislation and action.

GARY L. FRANCIONE is distinguished professor of law and Nicholas deB. Katzenbach Scholar of Law and Philosophy at Rutgers University School of Law-Newark. He is the author of numerous books and articles on animal ethics and animals and the law, including *Animals as Persons: Essays on the Abolition of Animal Exploitation*.

This is a subject of extremely heated debate, and Gary L. Francione and Robert Garner address it as no others can."—Gary Steiner, Bucknell University

Graphic Women

Life Narrative and Contemporary Comics

Hillary L. Chute

THE FIRST ACCOUNT OF AUTOBIOGRAPHICAL COMICS BY WOMEN, WHO ARE EXPANDING GRAPHIC NOVELS AND CHANGING THE FACE OF AUTOBIOGRAPHY.

Female cartoonists are playing a central role in the evolution of graphic novels. Some of the most acclaimed books of the twenty-first century, such as Marjane Satrapi’s *Persepolis* and Alison Bechdel’s *Fun Home*, are autobiographical comics by women. Aline Kominsky-Crumb pioneered the autobiographical form, showing women’s everyday lives, especially through the lens of the body. Phoebe Gloeckner places teenage sexuality at the center of her work, while Lynda Barry uses collage and the empty spaces between frames to capture the process of memory. Satrapi experiments with visual witness to frame her personal and historical narrative, and Bechdel meticulously incorporates family documents by hand to re-present her past.

These five cartoonists move the art of autobiography and graphic storytelling in new directions, particularly through the depiction of sex, gender, and lived experience. Hillary L. Chute explores their verbal and visual techniques, which have transformed autobiographical narrative and contemporary comics. Through the interplay of words and images and the counterpoint of presence and absence, they express difficult, even traumatic stories while engaging with the workings of memory. Intertwining aesthetics and politics, these women both rewrite and redesign the parameters of acceptable discourse.

Gilbert and Sullivan

Gender, Genre, Parody

Carolyn Williams

REPOSITIONING TWO POPULAR ARTISTS AS FIERCE
CRITICS OF SOCIAL NORMS.

Long before the satirical comedy of *The Daily Show* and *The Colbert Report*, the comic operas of Gilbert and Sullivan were the hottest send-ups of the day's political and cultural obsessions. Gilbert and Sullivan's productions always rose to the level of social commentary, despite being impertinent, absurd, or inane. Some viewers may take them straight, but what looks like sexism or stereotype was actually a clever strategy of critique. Parody was a powerful weapon in the culture wars of late-nineteenth-century England, and with defiantly in-your-face sophistication, Gilbert and Sullivan proved popular culture could be intellectually as well as politically challenging.

Carolyn Williams underscores Gilbert and Sullivan's creative and acute understanding of cultural formations. Anxiety drives the troubled mind in the "nightmare" patter song of *Iolanthe* and is vividly realized in the sexual and economic phrasing of Lord Chancellor's lyrics. The modern body appears automated and performative in the "railway" song of *Thespis*, mirroring Charlie Chaplin's factory worker in the film *Modern Times*. Williams also illuminates the use of magic in *The Sorcerer*, the parody of nautical melodrama in *H.M.S. Pinafore*, the ridicule of Victorian poetry in *Patience*, the autoethnography of *The Mikado*, the role of gender in *Trial by Jury*, and the theme of illegitimacy in *The Pirates of Penzance*.

CAROLYN WILLIAMS is professor of English at Rutgers University, where she teaches courses on Victorian literature, theater, and culture. She is the author of *Transfigured World: Walter Pater's Aesthetic Historicism*, as well as numerous essays and articles.

"Carolyn Williams highlights what ought to have been obvious all along about Gilbert and Sullivan's portrayal of gender: they are just kidding. Williams gives these wonderful works the reading they deserve."—Robyn Warhol-Down, Ohio State University

"In its details, intelligence, breadth of scholarship, and original archival research, this book offers treasures and a beautifully written, sometimes exhilarating read. This brilliant, unique contribution to Victorian studies will prove to be a benchmark."—Adrienne Munich, Stony Brook University

Ed Koch and the Rebuilding of New York City

Jonathan Soffer

THE FULL STORY BEHIND A PROVOCATIVE MAYOR WHO REMADE A CITY IN CRISIS.

In 1978, Ed Koch assumed control of a city plagued by filth, crime, bankruptcy, and racial tensions. In 1989, by the end of his mayoral run and despite the Wall Street crash of 1987, neighborhoods and infrastructure were being rebuilt. Unlike many American cities in the 1980s, Koch's New York was growing, not shrinking. Gentrification brought new businesses to neglected corners and converted low-end rental housing to coops and condos. Nevertheless, not all the change was positive—AIDS, crime, homelessness, and violent racial conflict increased, marking a time of great, if somewhat uneven, transition.

For better or worse, Koch's efforts convinced many New Yorkers to embrace a new political order that subsidized business, particularly finance, insurance, and real estate, and privatized public space. Each phase of the city's recovery required difficult choices between moneyed interests and social services, forcing Koch to be both a moderate and a pragmatist as he tried to mitigate growing economic inequality. Throughout, Koch's rough rhetoric (attacking his opponents as "crazy," "wackos," and "radicals") prompted the charge that he was racially divisive. The first book to recast Koch's legacy through personal and mayoral papers, authorized interviews, and oral histories, this volume plots a history of New York City through two rarely studied but crucial decades.

"Skillfully uses Ed Koch's administration to tell the story of the city from 1978 to 1990, a rags-to-riches saga with many lessons for today's cities as they cope with enormous financial pressure.

Whether or not you are a New Yorker, this marvelously told tale of a mayor and his city will grip you."—Lizabeth Cohen, Harvard University

"Well written, accessible, thoughtful, and deals with a subject many New Yorkers care deeply about."

—Sven Beckert, author of *The Monied Metropolis: New York City and the Consolidation of the American Bourgeoisie*

"By thoroughly examining the politics and policies of Ed Koch's mayoralty, Jonathan Soffer allows us to see more clearly the world in which we live."—Richard Greenwald, Drew University

Perversion for Profit

The Politics of Pornography and the Rise of the New Right

Whitney Strub

HOW SEX AND PORNOGRAPHY SHAPED POSTWAR
AMERICAN POLITICS.

While America is not alone in its ambivalence toward sex, its preferences swing sharply between toleration and censure. This pattern has grown even more pronounced since the 1960s, with the emergence of the New Right and its attack on the “floodtide of filth” supposedly sweeping the nation. Antipornography campaigns became the New Right’s political capital in the 1960s, laying the groundwork for the “family values” agenda that shifted the country to the right. *Perversion for Profit* traces the anatomy of this trend, recounting the debates over obscenity that consumed members of the ACLU in the 1950s, the deployment of obscenity charges against gay media during the Cold War, and the rise of the influential Citizens for Decent Literature during the 1960s.

Whitney Strub illustrates the crucial function of pornography in constructing the New Right agenda, which emphasized social issues over racial and economic inequality. He situates the fight over obscenity within the politics of 1950s pop culture and the pivotal events that followed: the sexual revolution, feminist activism, the “porno chic” moment of the early 1970s, and resurgent Christian conservatism, which now shapes public policy far beyond the issue of sexual decency. Following these battles to the early months of the Obama administration, Strub isolates the undercurrents of anticommunist rhetoric that once powered the antipornography movement and continues to permeate political discourse. Connecting the lowest forms of entertainment to the highest levels of government, he revolutionizes our understanding of sex and American politics.

WHITNEY STRUB is an assistant professor of history at Rutgers University.

“Marvelous. Whitney Strub’s genealogy of outrage from comic books to pornography is utterly original. It’s also convincingly and responsibly opinionated and full of life. The chapter on feminism and pornography is a masterpiece. It is a landmark chapter, one of the few historical essays that might actually end a sterile debate.—Rick Perlstein, author of *Before the Storm: Barry Goldwater and the Unmaking of the American Consensus*

“Ranging from Los Angeles to Memphis to LaCrosse, Wisconsin, and numerous small towns throughout the nation, Strub has done an admirable job of situating his analysis in the local arenas where these battles frequently take place. Persuasive and very important.”

Reforming the International Financial System for Development

Edited by Jomo Kwame Sundaram

SETTING A NEW AGENDA FOR COOPERATION, REGULATION, AND REFORM.

The 1944 Bretton Woods conference created new institutions for international economic governance, and, though flawed, the system led to a golden age in postwar reconstruction, sustained economic growth, job creation, and postcolonial development. Financial liberalization since the 1970s, however, has involved deregulation and globalization, which have exacerbated instability rather than stimulate growth. In addition, the failure of Bretton Woods to secure a reserve currency enabled the dollar to fill the void, contributing to periodic, massive deficits in U.S. trade.

*“Reforming the International Financial System for Development covers all the relevant territory. It is by far the best overall treatment of the important implications of the reform and regulation of the financial system for economic development.”—Jan Kregel, coauthor of *International Finance and Development**

Our latest global financial crisis, in which all of these weaknesses played a part, underscores how urgently we must reform the international financial system. Prepared for the G24 research program, a consortium of developing countries focused on financial issues, this volume argues that such reforms must be developmental. Chapters review historic trends in global liquidity, financial flows to emerging markets, and the food crisis, identifying the systemic flaws that brought about our present downturn. They challenge the effectiveness of recent policy and suggest criteria for regulatory reform, keeping in mind the different circumstances, capacities, and capabilities of various economies. Essays follow ongoing revisions in international banking standards, the improved management of international capital flows, the critical role of the World Trade Organization in liberalizing and globalizing financial services, and the need for international tax cooperation. They also provide a blueprint for a new global banking model and reserve.

JOMO KWAME SUNDARAM is assistant secretary general for economic development at the United Nations and research coordinator for the G24 Intergovernmental Group on International Monetary Affairs and Development.

Accounting for Value

Stephen Penman

RETURNING TO THE ROOTS OF QUALITY ANALYSIS
FOR A BETTER ASSESSMENT OF FINANCIAL VALUE.

Despite their skills and extensive training, many analysts fail to recognize the basics of good accounting. By focusing on abstract concepts such as measurement basis, exit values, and entity concepts, they miss out on the benefits of a practical approach to valuation. While modern finance has advanced important concepts, including diversification and risk measurement, effective and efficient accounting merges these tools with fundamental analysis to divine a true account of value.

Launching an innovative examination of equity evaluation as a matter of accounting, Stephen Penman embraces the commonsense ideas of finance fundamentalists—good firms can be bad buys; the risk in investing is the risk of paying too much; ignore information at your own peril; beware of paying too much for growth—to reestablish the parameters of good analysis. He compares fair-value accounting and historical-cost accounting; describes the anchoring of cash flows, book value, and earnings; and details the failure of modern finance to correctly assess value. He concludes with fundamental strategies for accounting for value and a bold proposal for assessing the cost of capital. Altogether, Penman's text is an essential tool for interpreting the greatest financial challenges of our time: the stock market bubble of the 1990s, the credit crisis of 2008, and accounting in the wake of ongoing market instability.

STEPHEN PENMAN is George O. May Professor of Accounting and Morgan Stanley Dean Witter Research Scholar at the Columbia Business School. He is the author of *Financial Statement Analysis and Security Valuation*, for which he received a Wildman Medal Award, and managing editor of the *Review of Accounting Studies*.

“This book cleverly weaves together important but otherwise unreconciled themes, enhancing our conceptual understanding of the nature and usefulness of accounting in valuation. Stephen Penman also updates the Benjamin Graham school of investment thought by incorporating changes in the economy, accounting, and financial modeling.”—Stephen Ryan, New York University, Stern School of Business

Politics of Culture and the Spirit of Critique

Dialogues

Edited by Alfredo Gomez-Muller and
Gabriel Rockhill

JUDITH BUTLER, CORNEL WEST, AXEL HONNETH,
AND OTHERS ON POLITICS, CULTURE, AND CRITICAL
THEORY.

The idea of “culture” has become central to intellectual debate since at least the end of the 1970s, with the reemergence of longstanding cultural issues becoming an indispensable part of moral and political critique. Additionally, the meaning of culture has expanded beyond its earlier, anthropological meaning to include issues of ethnicity, race, religion, gender, and sexual orientation.

Whether informing arguments about a “clash of civilizations” or underscoring the importance of “mainstream multiculturalism,” inflated notions of culture are ubiquitous, and their prevalence has generated new concerns. Criticism extends from the commodification of difference and the reification of identity to the further marginalization of outside voices. Refusing to reject the cultural shift in politics yet wholly aware of its potential dangers, the contributors to this volume propose innovative solutions and topical interventions. **Seyla Benhabib** conceptualizes culture as a hybrid and polyvocal system of action and signification. **Nancy Fraser** strives to solve the recognition/redistribution conundrum. **Judith Butler** deconstructs sexual and gender identities. **Cornel West** rejects Black Nationalism and racial reasoning in favor of a cultural democracy that unites various struggles for equality, and **Axel Honneth** details a normative account of social integration in terms of mutual recognition.

ALFREDO GOMEZ-MULLER is professor of Latin American studies at the Francois-Rabelais University in Tours and the author of numerous books, including *Sartre: De la nausée à l'engagement* and *Ethique, co-existence et sens*.

GABRIEL ROCKHILL is assistant professor of philosophy at Villanova University and the author of *Logique de l'histoire: Pour une analytique des pratiques philosophiques*.

“The scope, precision, and flow of these interviews, as well as the significance and range of the thinkers, make this volume a valuable contribution to critical theory and the philosophy of culture.”—Alia Al-Saji, McGill University

Haunting Legacies

Violent Histories and Transgenerational Trauma

Gabriele Schwab

THE PSYCHIC LIFE OF VIOLENT HISTORIES AS EXPERIENCED BY AUTHORS AND OTHERS WHO INHERIT THEM.

From mass murder to genocide, slavery to colonial suppression, acts of atrocity have lives that extend far beyond the horrific moment. They engender trauma that echoes throughout later generations, within those tied to both sides of the act. Gabriele Schwab reads these legacies in a number of narratives, primarily through the writing of postwar Germans and the descendents of Holocaust survivors. She connects their work to earlier histories of slavery and colonialism and to more recent events, such as South African Apartheid, the practice of torture after 9/11, and the “disappearances” that occurred during South American dictatorships.

Schwab's texts include memoirs (Ruth Kluger's *Still Alive* and Marguerite Duras's *La Douleur*), second-generation accounts by the children of Holocaust survivors (Geroges Perec's *W*, Art Spiegelman's *Maus*, and Philippe Grinbert's *Secret*), and second-generation recollections by Germans (W. G. Sebald's *Austerlitz*, Sabine Reichel's *What Did You Do in the War, Daddy?*, and Ursula Duba's *Tales from a Child of the Enemy*). She also incorporates her own reminiscences growing up in postwar Germany, mapping networks of interlaced memories and histories as they interact in psychic life and cultural memory. Her critical approach draws on theories from psychoanalysis, post-colonialism, and trauma studies, and Schwab concludes with a bracing look at issues of responsibility, reparation, and forgiveness across the victim/perpetrator divide.

“In this highly original and courageous study, Gabrielle Schwab breaks new ground in the study of trauma and its intergenerational transmission, doing so through a special focus on the long-term effects of violent histories on the generations of both victims and perpetrators.”—Michael Levine, Rutgers University

PHILOSOPHY / HISTORY

All Rights: Columbia University Press

“Like Plato synthesizing Parmenides’ world of eternal being and Heraclitus’s world of constant change, Christopher Coker compels his readers to think through what Clausewitz and Sun called the enduring yet ever-changing character of war. A splendid introduction for specialists and nonspecialists alike.”—Karl F. Walling, United States Naval War College

Barbarous Philosophers

Reflections on the Nature of War From Heraclitus to Heisenberg

Christopher Coker

REPOSITIONING WAR NOT AS A NATURAL PHENOMENON BUT AS AN INVENTION OF PHILOSOPHY.

From Heraclitus in the sixth century B.C.E. to the twentieth-century philosopher-physicist Werner Heisenberg, intellectuals have struggled to make sense of war and its presence in human society. Yet, as Christopher Coker contends, it is philosophers who created the concept of war, largely by defining its rules and establishing an oppositional dialectic of peace. The Greeks were the first to outline what Blaise Pascal called the “rules of war,” and through their description of its “nature,” influenced the thinking of contemporary generals and their military strategy.

Nevertheless, this is not a book on the philosophical underpinnings of war but on the particular problems we face while fighting war today. Guided by the work of seventeen major thinkers, Coker examines the belief that war is a continuation, rather than a negation, of politics by other means; the idea that we should respect those who don’t respect us; the notion that war can help a soldier reaffirm his humanity; and the odd fact that peace remains a contested concept. Coker draws on sixteen philosophers who have tackled war directly and intensely in their writing. Each chapter begins with an epigram distilling the essence of a chosen philosopher’s thinking on war and uses it as a prism through which to analyze the aspects of war most relevant to contemporary combat.

CHRISTOPHER COKER is professor of international relations at the London School of Economics and adjunct professor at the Staff College in Oslo.

The Shift

Israel-Palestine from Border Struggle to Ethnic Conflict

Menachem Klein

REVEALING A TROUBLING NEW PHASE IN THE
TREATMENT OF PALESTINIANS BY THE ISRAELI
STATE.

Since 2000, the Israeli army has increased the size and strength of its operations in occupied territories. These activities, matched with an unprecedented rise in the construction of Jewish settlements, have irrevocably changed the relationship between Palestinians and Israelis. As Menachem Klein sees it, what was once a border conflict has now become an ethnic struggle, with Jewish Israel establishing an ethno-security regime from Jordan to the Mediterranean, facilitated and accelerated by the recent results of elections in Israel, the United States, and the territory controlled by the Palestinian Authority.

In a bold challenge to those who claim Israel has done nothing more than pursue a framework of “occupation,” Klein identifies a radical shift that has put ethnicity at the center of its security initiatives. Even Israeli citizens of Palestinian origin are at risk of becoming targets. Klein closely reads the legal and political apparatus cocooning Israel’s shrinking Jewish majority. Within this system, Palestinians have been divided into several categories with different privileges. Grounding his work in primary sources and hard-to-find statistics, Klein completes a groundbreaking, unflinching study that portrays the realities of the Israeli-Palestinian conflict. He ultimately argues that a single, nonethnic state is not the best solution and supports a two-state compromise, as difficult as it may be, since it is the only viable way to peace.

MENACHEM KLEIN is a senior lecturer in the Department of Political Science at Bar-Ilan University, Israel, and was a team member of the Geneva Initiative negotiations of 2003. He has advised both the Israeli government and the Israeli delegation for peace talks with the PLO and has been a fellow at Oxford University and F. Braudel Senior Fellow at the European University Institute, Florence.

“The strongest part of this book is its material on settlers and its analysis of how they have become stitched into the military and bureaucratic fabric of both sides of the 1967 ‘border.’ Readers get a sense of the ideological forces ‘from below’ that drive ‘radical’ settlers, as well as a sense of the powerful political and military structures that help them continue to expand.”—John Chalcraft, London School of Economics

“A must read for would-be peacemakers and analysts who traverse the tough terrain of the much-too-promised land. Menachem Klein has written a brilliant and compelling account of the hard ground truths that now shape the Israeli-Palestinian struggle and seem to preclude a happy outcome.”

A History of Finland

Directions, Structures, Turning Points

Henrik Meinander

Translated from Swedish by Tom Geddes

THE FULL STORY BEHIND A COUNTRY THAT
HAS ALWAYS FOLLOWED ITS OWN LEAD.

Henrik Meinander completes a brisk and bold portrait of Finland, recounting its early beginnings as a member of the Swedish kingdom to its later years as an autonomous Grand Duchy within the Russian empire. It concludes with Finland's gradual transformation into a conscious nation and its current flourishing as an independent, modernized state. Meinander concentrates on the Baltic region, connecting his history to major turning points in Europe's social, political, and structural development. He blends politics, economy, and culture to illuminate how other countries have utilized Finland's natural resources and have coopted its cultural heritage and technological innovations.

HENRIK MEINANDER is professor of history at the University of Helsinki.

TOM GEDDES has translated numerous novels and biographies from Swedish and Norwegian into English.

Emirati Women

Generations of Change

Jane Bristol-Rhys

THE UNITED ARAB EMIRATES' MOST VULNERABLE POPULATION SPEAK ABOUT THEIR NEWFOUND STATUS.

The discovery of oil in the late 1960s catapulted Abu Dhabi out of isolating poverty. A boom in construction introduced new sightlines to the city's landscape and transformed its infrastructure and economy. The impressive growth of just a few decades created new opportunities for work and play, allowing a social welfare system to take root offering free education, medical treatment, generous pensions, family subsidies, and government incentives. Citizens were suddenly encouraged to participate in all aspects of their remaking, and the wealth brought in from a seemingly limitless oil economy enabled many households to acquire a sheen of sophistication.

The pattern of Abu Dhabi's phenomenal growth can be traced throughout the United Arab Emirates, yet consumption hasn't cast the Emirates in a very favorable light. Both at home and abroad, many have accused Emirati citizens of violating the limits of taste and tolerance. *Emirati Women* offers a rare perspective on the lives of those who have been affected most by the Emirates' rise in power. Jane Bristol-Rhys merges eight years of conversations and interviews with her own personal observations on Abu Dhabi society, boldly confronting the unflattering stereotypes that quietly flourish among expatriate communities. Her fascinating findings speak to such topics as marriage, independence, freedom, and the future.

JANE BRISTOL-RHYS is an assistant professor in the Department of Social and Behavioral Sciences at Zayed University. An Arabic-speaking cultural anthropologist, she has lived in the Middle East for twenty years and is the author of many articles on Emirati women, public discourse on Emirati identity, and how Emiratis narrate their pre-oil past.

"Little has been written on the Arab Gulf countries that conveys the worldview of the local people through oral narratives. That is exactly what this book accomplishes, giving a voice to those who are otherwise marginalized and ignored, thereby revealing a fascinating world."

The Implied Spider

Politics and Theology in Myth
Updated with a New Preface
Wendy Doniger

“An entertaining and highly accessible look at how myths reveal what is common to all humanity.”—*Parabola*

Wendy Doniger’s perennially selling study is both modern in its engagement with a diverse range of religions and refreshingly classic in its transhistorical, cross-cultural approach. Doniger reinvigorates the comparative reading of religion through a responsible analysis of patterns and themes across context. Her work is a powerful antidote to the paralysis of postcolonial theory, which rightfully condemns the reduction of religious practice to simple universals. Tapping into a wealth of narrative traditions, from the instructive tales of Judaism and Christianity to the moral lessons of the *Bhagavad Gita*, Doniger extracts political meaning from a variety of texts while respecting the original ideas of each. Her new preface confronts the difficulty of research in this area, addressing the controversy of choosing subjects and positioning one’s argument. The text itself is updated throughout.

PRAISE FOR THE PREVIOUS EDITION:

“A racy, enjoyable book. . . . Deriving from Plato an understanding of myth as both truth and lie, Wendy Doniger brings to her study a wealth of story and folklore from many different traditions, exploring creatively the enduring role of myth through time and across cultures.”
—*Theological Book Review*

“A timely meditation on what comparative studies might mean . . . a cross-cultural comparison of different stories from different areas of the world, different tribes, different languages.”—*London Review of Books*

WENDY DONIGER is Mircea Eliade Distinguished Service Professor of the History of Religions in the Divinity School at the University of Chicago. Her books include *Dreams, Illusions, and Other Realities*; *Other Peoples’ Myths*; *The Cave of Echoes*; and the English-language edition of Yves Bonnefoy’s *Mythologies*.

“A book that is particularly worthy of the attention of readers in religious studies beyond the history of religions. Since it is Wendy Doniger’s most methodological book, *The Implied Spider* is important, not for its analysis of myths, but for the arguments that it makes in support of the comparative study of myths.”—*Religious Studies Review*

“By analyzing the political, theological, and psychological structures of the sacred stories of various cultures through time, from the Hebrew Bible to *Star Trek*, Doniger shows how myths create a shared interdisciplinary narrative of all human creatures. . . . Ranging widely, she offers a detailed, scholarly account.”—*Library Journal*

The Demon at Agi Bridge and Other Japanese Tales

Edited by Haruo Shirane

Translated by Burton Watson

WILDLY IMAGINATIVE STORIES REFLECTING THE
MULTIFACETED WORLD OF MEDIEVAL JAPAN.

Haruo Shirane and Burton Watson, renowned translators and scholars, introduce English-speaking readers to the vivid tradition of early and medieval Japanese folktales. Taken from seven major anthologies of anecdotal (*setsuwa*) literature compiled between the ninth and thirteenth centuries, these dramatic and often amusing stories offer a major view of the foundations of Japanese culture.

Out of thousands of *setsuwa*, Shirane has selected thirty-eight of the most powerful and influential tales, each of which is briefly introduced. Recounting the exploits of warriors, farmers, priests, and aristocrats, and concerning topics as varied as poetry, violence, power, and sex, these texts reveal the creative origins of a range of literary genres, from court tales and travel accounts to noh drama and kabuki. Watson's impeccable translations relay the wit, mystery, and Buddhist sensibility of these protean works, and Shirane's sophisticated analysis illuminates the meaning of the tales, as well as the character of the anthologies. A comprehensive bibliography completes the volume.

HARUO SHIRANE is Shincho Professor of Japanese literature at Columbia University and the editor of, most recently, *Traditional Japanese Literature: An Anthology, Beginnings to 1600* and *Envisioning The Tale of Genji: Media, Gender, and Cultural Production*.

BURTON WATSON has translated dozens of Chinese and Japanese classics, including *The Analects of Confucius* and *The Tales of the Heike*.

“Burton Watson is the preeminent translator of classical Chinese and Japanese literature working today, and Haruo Shirane is his generation's foremost scholar of classical Japanese literature.”—David T. Bialock, University of Southern California

“Burton Watson is one of the best translators alive today, and his work here is superb. With an easy grace, he brings these tales to life like few have done before.”—Randle Keller Kimbrough, University of Colorado-Boulder

Humans, Beasts, and Ghosts

Stories and Essays

Qian Zhongshu

Edited by Christopher G. Rea

EARLY WRITINGS BY AN INGENIOUS WIT AND EXCEPTIONAL STYLIST.

Zhongshu Qian was one of twentieth-century China's most ingenious literary stylists, the author of short stories, essays, and a brilliant comedic novel that has inspired generations. Writing between the early years of the Second Sino-Japanese War (1937–1945) and the Communist takeover in 1949, Qian was a pioneering modernist and extraordinary satirist whose insight into the irony and travesties of modern China remains stunningly fresh.

“So long as wit and satire, insightfully imagined characterization, and unmatched erudition matter in literature, Qian Zhongshu's writing will have a place, and this translation of his work is among the most significant renderings from the Chinese.”—Ron Egan, University of California, Santa Barbara

This eagerly awaited translation joins Qian's collection of iconoclastic essays on life, language, and literature, *Written on the Margins of Life* (1941), with his masterful short story collection, *Humans, Beasts, and Ghosts* (1946). Qian's essays elucidate substantive issues through deceptively simple subjects—the significance of windows versus doors, for example, or the blind spots of literary critics—and assert the primacy of critical and creative independence. His humorous stories blur the boundaries between various incarnations of humans, beasts, and ghosts struggling through life, death, and resurrection. Christopher Rea situates these works within China's wartime politics and Qian's literary vision, highlighting significant changes between different editions that provide unprecedented insight into the author's creative process.

QIAN ZHONGSHU (1910–1998), hailed as twentieth-century China's “foremost man of letters,” is best known for his novel, *Fortress Besieged*, and a groundbreaking study of the Chinese literary canon, *Limited Views: Essays on Ideas and Letters*.

CHRISTOPHER G. REA is assistant professor of modern Chinese literature at the University of British Columbia.

The Curious Tale of Mandogi's Ghost

Kim Sök-pöm

Translated by Cindi Textor

A SUBVERSIVE NOVEL ABOUT THE TRAUMA OF COLONIALISM AND THE POWER OF RESISTANCE.

A central work of postwar Japanese fiction, *The Curious Tale of Mandogi's Ghost* incorporates Korean folk tales, ghost stories, and myth into a phenomenal depiction of epic tragedy. Written by a *zainichi*, a permanent resident of Japan who is not of Japanese ancestry, the novel inventively imagines a long-suppressed event in Japanese colonial history—the Cheju Uprising of 1948—and captures in style and substance the predicament of Koreans living under Japanese rule.

Kim Sök-pöm tells the story of Mandogi, a young priest living on the island of Cheju-do. Mandogi becomes unwittingly involved in the Four-Three Incident of 1948, in which the South Korean government brutally suppressed an armed peasant uprising and purged Cheju-do of communist sympathizers. Although Mandogi is sentenced to death for his part in the riot, he survives (in a sense) to take revenge on his enemies and fully commit himself to the resistance. Mandogi's indeterminate, shapeshifting character is emblematic of colonialism's outsized impact on both ruler and ruled. One of the most significant *zainichi* novels to date, *The Curious Tale of Mandogi's Ghost* relates the trauma of a long-forgotten history and its indelible imprint on Japanese and Korean memory.

KIM SÖK-PÖM (b. 1925) was born in Osaka, Japan, to Korean parents who emigrated from the island of Cheju-do. He is best known for his seven-volume fictional work, *Kazanto* (Volcano island), which centers on the Cheju Uprising of 1948.

CINDI TEXTOR is a graduate student in the Department of East Asian Literatures and Cultures at the University of Illinois at Urbana-Champaign.

"The Curious Tale of Mandogi's Ghost is much more than a 'ghost story' or a 'tall tale.' This masterpiece of postwar Japanese literature by a Korean resident of Japan is a sophisticated rumination on the power of words and narratives to create cultural identities and to challenge historical truths."—Christopher D. Genetic Justice

DNA Data Banks, Criminal Investigations, and Civil Liberties

Sheldon Krinsky and Tania Simoncelli

A PROVOCATIVE RECONSIDERATION OF DNA'S INFALIBILITY AND ITS ROLE IN THE COURTS.

National DNA databanks were initially established to catalogue the identities of violent criminals and sex offenders. However, since the mid-1990s, forensic DNA databanks have expanded in some states and nations to include all people who have been arrested, regardless of whether they've been charged or convicted of a crime.

Two prominent advisors on medical ethics, science policy, and civil liberties take a hard look at how the United States, Australia, Japan, and European countries have balanced the use of DNA databanks in criminal justice with the privacy rights of their citizenry. Sheldon Krinsky and Tania Simoncelli analyze the constitutional, ethical, and sociopolitical implications of expanded DNA collection in the United States and compare these findings to trends in other locations. They examine the legal precedent for taking DNA from juveniles, searching DNA databases for possible family members of suspects, conducting “DNA dragnets” of local populations, and the warrantless acquisition of so-called abandoned DNA. Most intriguing, Krinsky and Simoncelli explode the myth that DNA profiling is infallible, which has profound implications for criminal justice.

SHELDON KRIMSKY is professor of urban and environmental policy and planning and adjunct professor of public health and family medicine at Tufts University. He has consulted for the Presidential Commission for the Study of Ethical Problems in Medicine and Biomedical and Behavioral Research and the Congressional Office of Technology Assessment.

TANIA SIMONCELLI is the science advisor in the technology and liberty program of the American Civil Liberties Union, where she speaks, publishes, and provides expert guidance on critical scientific and science policy issues that challenge civil liberties.

The Worst-Kept Secret

Israel's Bargain with the Bomb

Avner Cohen

BREAKING ISRAEL'S CODE OF NUCLEAR SILENCE.

Israel has made a unique contribution to the nuclear age—it has created (with the tacit support of the United States) a special “bargain” with its bomb. Israel is the only nuclear-armed state that keeps its bomb invisible, unacknowledged, opaque. It will only say that it will not be the first to introduce nuclear weapons to the Middle East.

The bomb is Israel's collective ineffable—the nation's last taboo. This bargain has a name: in Hebrew, it is called *amimut*, or opacity. By adhering to the bargain, which was born in a secret deal between Richard Nixon and Golda Meir, Israel creates a code of nuclear conduct that encompasses both governmental policy and societal behavior. The bargain lowers the salience of Israel's nuclear weapons, yet it also remains incompatible with the norms and values of liberal democracy. It relies on secrecy and opacity. It infringes on the public right to know and negates the notion of public accountability and oversight, among other offenses.

Author of the critically acclaimed *Israel and the Bomb*, Avner Cohen offers a bold and original study of this politically explosive subject. Arguing that the bargain has become increasingly anachronistic, Cohen calls for a reform in line with domestic democratic values as well as current international nuclear norms. Most important, he believes the old methods will prove inadequate in dealing with a nuclear Iran. Cohen concludes with fresh perspectives on Iran, Israel, and the effort toward global disarmament.

AVNER COHEN has been a senior research fellow at the National Security Archive at George Washington University and coeditor of *Nuclear Weapons and the Future of Humanity* and *The Institution of Philosophy*.

“This book, like Avner Cohen’s *Israel and the Bomb*, is a highly original contribution. There is nothing like it, and probably no one else could have written it. The volume is a sensitive understanding of the constant tension between ‘resolve’ and ‘caution’ in Israeli policy, an understanding that has been absent in many other studies.”—Alan Dowty, Harvard University

The Novelist's Lexicon

Writers on the Words that Define Their Work

Edited by Villa Gillet / *Le Monde*

JONATHAN LETHEM, RICK MOODY, A. S. BYATT AND
 OTHERS OFFER A FASCINATING PORTAL INTO THE
 HEART OF THE NOVEL.

At a recent literary conference hosted by Villa Gillet and *Le Monde*, organizers asked dozens of prominent authors from around the world to choose a word that opens the door to their work. Their crystalline musings, collected here for the first time, offer an extraordinary portrait of writing and reading from the perspective of the artist. Organized alphabetically, the anthology is a pleasurable and instructive book for writers, readers, and anyone seeking an intimate understanding of literature.

Through these personal “passwords,” authors articulate the function of language, character, plot, and structure, and, in the process, reveal their relationship with the elements of story. **Jonathan Lethem** discusses the independent life of furniture; **A. S. Byatt** describes the power of the narrative web; **Etgar Keret** explains *balagan*, a Hebrew word meaning “total chaos”; **Daniel Mendelsohn** expounds on the unknowable, or what the author should or should not impart to the reader; **Annie Proulx** clarifies *terroir*, which embodies the complexities of time, place, geography, weather, and climate; and **Colum McCann** details the benefits of anonymity. Other participants include **Rick Moody** on adumbrated; **Upamanyu Chatterjee** on the bildungsroman; **Enrique Vila-Matas** on discipline; **Adam Thirlwell** on hedonism; **Nuruddin Farah** on identities; **André Brink** on the heretic; and **Péter Esterhazy** on the power and potential of words, words, words.

Created in 1987 by the Region Rhone Alpes, the **VILLA GILLET** operates as a center for the study and promotion of contemporary art and thought. In collaboration with *Le Monde*, they began the acclaimed festival and conference International Forum on the Novel in 2007.

Prison Notebooks

Volume 1

Antonio Gramsci

Edited and translated by Joseph A. Buttigieg

“Gramsci’s *Prison Notebooks* have long been among the most remarkable documents of Western political thought. This edition is a poignant record of his thoughts from a Fascist prison cell, adding a human touch to a key political figure.”—Terry Eagleton

Antonio Gramsci (1891–1937) is considered the most original political thinker in Western Marxism. Imprisoned by the Italian Fascist regime in 1926, Gramsci died before fully regaining his freedom. Nevertheless, his prison notebooks record thousands of brilliant reflections on an extraordinary range of subjects, establishing an enduring intellectual legacy. This volume opens with an introduction outlining Gramsci’s project and the circumstances surrounding the composition of his notebooks. It features a detailed chronology of the author’s life and translations of earlier writings and letters. The volume then follows with notebooks 1 and 2, which set the foundations for Gramsci’s later writings.

Prison Notebooks

Volume 2

Antonio Gramsci

Edited and translated, with an Introduction, by Joseph A. Buttigieg

“Altogether a tremendous achievement. . . . This volume provides us with an immediate sense of the scale and diversity of Gramsci’s project.”

—*Times Literary Supplement*

Volume 2 contains notebooks 3, 4, and 5, which Antonio Gramsci wrote between 1930 and 1932. Their central themes are popular culture, Italian history, Americanism, and the Catholic Church as a religious institution and politico-ideological force. Gramsci touches on the Renaissance and Reformation, language and linguistics, military and diplomatic history, and Japanese and Chinese culture. Notebook 4 features an innovative reading of canto 10 from Dante’s *Inferno* and a philosophical analysis of materialism and idealism.

“In Gramsci, Marxism acquires the founder of a proletarian intellectual tradition that is likely to continue as long as society has use for democracy.”—*Italian Quarterly*

Prison Notebooks

Volume 3

Antonio Gramsci

Edited and translated by Joseph A. Buttigieg

"Prison Notebooks is one of the fundamental texts of modern thought. Politics, cultural studies, philosophy, history, the dialectic—everything is here. Joseph A. Buttigieg's translation is a superb achievement."—Fredric Jameson

In notebooks 6, 7, and 8, Antonio Gramsci develops his concepts of hegemony, civil society, and the state; reflects extensively on the Renaissance, the Reformation, and Machiavelli's political philosophy; and offers a trenchant critique of the cultural and political practices of fascism. Also included are Gramsci's extensive observations on the articles and books he read during his imprisonment.

"Gramsci remains one of the most important figures in modern Italian intellectual history and the most influential internationally."—Eric Hobsbawm, Birkbeck College, London University

Three Volume Set

Antonio Gramsci

Edited and translated by Joseph A. Buttigieg

"The first time ever that Antonio Gramsci's extraordinary Prison Notebooks are available in English as he wrote them in Italian, in their fragmentary brilliance and their disconcertingly restless, unorthodox probity. Joseph A. Buttigieg's work is a monument of scholarship and of supple, deeply sensitive translation."—Edward W. Said

Columbia University Press's multivolume *Prison Notebooks* is the only complete critical edition of Antonio Gramsci's seminal writings in English. Based on the authoritative Italian edition of Gramsci's work, *Quaderni del Carcere*, this comprehensive translation presents the intellectual as he ought to be read and understood, with critical notes that clarify Gramsci's history, culture, and sources; an index of names; and a contextualization of the thinker's ideas against his earlier writings and letters. This set includes notebooks 1 through 8 with all attendant notes and materials and is an indispensable resource for scholars in the humanities and social sciences.

Horrorism

Naming Contemporary Violence

Adriana Cavarero

Translated by William McCuaig

"Essential."—Choice

Adriana Cavarero, one of the world's most provocative feminist theorists and political philosophers, introduces a new word—horrorism—to capture the experience of violence. Unlike terror, horrorism is a form of violation grounded in the offense of disfiguration and massacre. Numerous outbursts of violence fall within Cavarero's category, especially when considered from the perspective of the victim. Cavarero locates horrorism in the philosophical, political, literary, and artistic representations of defenseless and vulnerable victims, and she forges a link between horror, extermination, and massacre, especially in the Nazi death camps.

"A remarkable meditation on the macabre world of modern political violence that will appeal to a wide range of readers."—Arjun Appadurai, New York University

ADRIANA CAVARERO is professor of political philosophy at the University of Verona.

The Scientific Way of Warfare

Order and Chaos on the Battlefields of Modernity

Antoine J. Bousquet

"Antoine J. Bousquet translates a series of profound scientific developments into an accessible and engaging narrative of technology as artifact and metaphor. He writes with great eloquence and texture, while simultaneously treating complex theoretical issues with the light touch that will ensure a large audience."—Michael Innes, Syracuse University

Beginning with the scientific revolution and concluding with today's terrorist networks, Antoine J. Bousquet advances a novel history of scientific methodology in the context of the battlefield. He explores the benefits (such as a unique chain of command to safeguard the use of nuclear weapons) and decentralizing (such as the flexible networks that connect insurgents) of military affairs, and follows with specific scientific approaches to war: mechanistic, thermodynamic, cybernetic, and a network-centric theory allied with the nonlinear sciences.

ANTOINE J. BOUSQUET is lecturer in international relations at Birkbeck College, University of London.

A Tragedy of Democracy

Japanese Confinement in North America

Greg Robinson

“A superb history about one of the more shameful chapters in U.S. history.”—*The Japan Times*

Greg Robinson reveals the extent of the American government’s surveillance of Japanese communities in the years leading up to World War II and the construction of what officials termed “concentration camps” for enemy aliens. He also considers the place of Japanese Americans in civil rights struggles and the movement for redress, and the role of the camps as touchstones for commemoration and debate.

“Deftly merges the Pacific Rim experience into one coherent magnum opus.”—*Nichi Bei Times*

“Memorable . . . revealing.”—*Times Literary Supplement*

“Original and comprehensive. Uses archival materials that have never been analyzed before and the work extends beyond the United States to Canada and Latin America.”—Frank Wu, author of *Yellow*

Strange Wonder

The Closure of Metaphysics and the Opening of Awe

Mary-Jane Rubenstein

"A very fine combination of lucid exposition of extremely intractable material, meticulous scholarship, and a genuinely original contribution to burning issues in contemporary philosophy, theology, and philosophical theology."—Denys Turner, Yale University

Mary-Jane Rubenstein locates a reopening of wonder's primordial uncertainty in the work of Martin Heidegger, for whom wonder is first experienced as the shock at the groundlessness of things and then as an astonishment that things nevertheless *are*. She traces this double movement through Emmanuel Levinas, Jean-Luc Nancy, and Jacques Derrida, ultimately thematizing wonder as the awesome, awful opening that exposes thinking to devastation as well as transformation. In Rubenstein's study, wonder reveals the extraordinary in and through the ordinary and is crucial to reimagining political, religious, and ethical thought.

MARY-JANE RUBENSTEIN is assistant professor of religion at Wesleyan University.

The Multivoiced Body

Society and Communication in the Age of Diversity

Fred Evans

"The kind of book that establishes new, more interdisciplinary fields of study in social-political philosophy."—*Journal of Philosophy*

By envisioning the public as a multivoiced body, Fred Evans offers a solution to the dilemma of diversity. The multivoiced body is one and many—heterogeneous voices that separate and bind themselves together through their continuous and creative interplay. By focusing on this notion, Evans shows how we can valorize the solidarity, diversity, and richness of society and resist the urge to raise a single discourse to the level of "one true God," "pure race," or some other "oracle." To build his argument, he draws on the major figures and themes of analytic and continental philosophy, as well as modernist, postmodernist, postcolonial, and feminist discourses.

"The breadth and scope of this book are dazzling."—Kelly Oliver, Vanderbilt University

FRED EVANS is professor of philosophy and director of the Center for Interpretive and Qualitative Research at Duquesne University.

Not Being God

A Collaborative Autobiography

Gianni Vattimo

With Piergiorgio Paterlini
Translated by William McCuaig

“Speaking from the heart of Vattimo, this book is often very funny and reads like a novel, yet it is also an extraordinary introduction to the important work of a master thinker of postmodernism.”—Jean Grondin, author of *Introduction to Philosophical Hermeneutics*

Gianni Vattimo reflects on a lifetime of politics, sexual radicalism, and philosophical exuberance in postwar Italy. Turin forms the core of his reminiscences, enhanced by fascinating vignettes of studying under Hans Georg Gadamer, teaching in the United States, serving as a public intellectual and interlocutor of Habermas and Derrida, and working within the European Parliament to unite Europe. One of the most compelling accounts of homosexuality, history, politics, and philosophical invention in the twentieth century.

GIANNI VATTIMO teaches philosophy at the University of Turin and is a renowned public intellectual and member of the European parliament.

PIERGIORGIO PATERLINI is a writer and journalist living in Italy.

The Columbia Anthology of Modern Chinese Drama

Edited and with an introduction by Xiaomei Chen

The first of its kind in English, this anthology reproduces twenty-two popular plays from 1919 to 2000, accompanied by a comprehensive introduction to the historical, cultural, and aesthetic evolution of twentieth-century Chinese spoken drama. Primarily composed of works from the People's Republic of China, with representative plays from Hong Kong and Taiwan, this collection showcases more than the revolutionary rethinking of Chinese theater and performance that began in the late Qing dynasty. It reflects the formation of Chinese national and gender identities during a period of tremendous social and political change—not to mention the genesis of contemporary attitudes toward the West.

Early-twentieth-century Chinese drama embodies the uncertainty and anxiety brought on by modernism, socialism, political conflict, and war. After 1949, the PRC theater paints a complex portrait of the rise of communism in China, with the ideals of Chinese socialism juxtaposed against the sacrifices made for a new society. The Cultural Revolution promoted a “model theater” cultivated from the achievements of earlier, leftist spoken drama, despite the fact that this theater rose from the destruction of old culture. Post-Mao drama addresses the Chairman’s legacy and the attempts made by a wounded nation to reexamine its cultural roots. Taiwan’s spoken drama uniquely synthesizes regional and foreign traditions, and Hong Kong’s spoken drama sparkles as a hybrid of Chinese and Western influences. Immensely valuable for scholars of cross-disciplinary, comparative, and performance study, this anthology identifies China’s place within global culture and economy.

XIAOMEI CHEN is professor of Chinese and comparative literature at the University of California at Davis. Among her books are *Acting the Right Part: Political Theater and Popular Culture in Contemporary China* and *Reading the Right Text: An Anthology of Contemporary Chinese Drama*.

“A great piece of historical and analytical scholarship, evincing a breadth of history and depth of ideological critique hard to find in critics preoccupied with body and performance. The plays are not simply material for historical survey; their line-up forms an argument on China’s pursuit of modernity, social justice, and equality.”

Classical Arabic Stories

An Anthology

Edited by Salma Khadra Jayyusi

Short fiction was an immensely popular art in the medieval and premodern Arab world, providing the perfect vehicle for transmitting the tenets of classical Islam. Reading these texts today illuminates the wide spectrum of early Arab life and suggests the influences and innovations that flourished so vibrantly in medieval Arab society.

The only resource of its kind, Salma Khadra Jayyusi's *Classical Arabic Stories* chooses from an impressive corpus, including excerpts from six seminal works: Ibn Tufail's novel *Hayy ibn Yaqzan*; Ibn al-Muqaffa's *Kalila wa Dimna*; *The Misers of al-Jahiz*; The Brethren of Purity's *Protest of Animals Against Man*; *Al-Maqamat* (The Assemblies), and the epic romance *Sayf Bin Dhi Yazan*. Jayyusi organizes her anthology thematically, beginning with a presentation of pre-Islamic tales, the stories of rulers and other notables, and thrilling narratives of danger and warfare. She follows with tales of religion, comedy, the strange and the supernatural, and love. Long assumed to be the lesser achievement in comparison to Arabic literature's most celebrated genre—poetry—classical Arabic fiction, under Jayyusi's careful eye, finally receives its proper debut, demonstrating its unparalleled contribution to the evolution of medieval literature and its sophisticated representation of Arabic culture and life.

SALMA KHADRA JAYYUSI is the author of the two-volume *Trends and Movements in Modern Arabic Poetry* and the editor of *Modern Arabic Fiction: An Anthology*; *Modern Arabic Poetry: An Anthology*; *Anthology of Modern Palestinian Literature*; and *The Legacy of Muslim Spain*. The winner of many prestigious awards, including the Sultan al Owais Cultural and Scientific Achievement Prize, the Edward Said Award for Career Excellence, and the award of the Olive Branch Organization in Lebanon for "Cultural Accomplishment," she is the founder and director of East-West Nexus, dedicated to the study of Arabic civilization and cultural achievements, and the Project of Translation from Arabic, PROTA.

The Columbia History of the Vietnam War

Edited by David L. Anderson

America's experience in Vietnam continues to figure prominently in debates over strategy and defense and within the discourse on the identity of the United States as a nation. Through fifteen essays rooted in recent scholarship, *The Columbia History of the Vietnam War* is a chronological and critical collective history central to any discussion of America's interests abroad.

David Anderson opens with an essay on the Vietnam War's major themes and enduring relevance. Mark Philip Bradley (University of Chicago) reexamines the rise of Vietnamese revolutionary nationalism and the Vietminh-led war against French colonialism. Richard Immerman (Temple University) revisits Eisenhower's and Kennedy's efforts at nation building in South Vietnam. Gary Hess (Bowling Green State University) reviews America's military commitment under Kennedy and Johnson, and Lloyd Gardner (Rutgers University) investigates the motivations behind Johnson's escalation of force.

John Prados (National Security Archive) and Eric Bergerud (Naval Postgraduate School) devote their essays to America's military strategy. Helen Anderson (California State University, Monterey Bay) and Robert Brigham (Vassar College) explore the war's impact on Vietnamese women and urban culture. Melvin Small (Wayne State University) recounts the domestic tensions created by America's involvement in Vietnam, and Kenton Clymer (Northern Illinois University) follows the spread of the war to Laos and Cambodia. Concluding essays by Robert Schulzinger (University of Colorado) and George Herring (University of Kentucky) trace the legacy of the war and diagnose the symptoms of the "Vietnam Syndrome" evident in later U.S. foreign policy debates.

DAVID L. ANDERSON is professor of history at California State University, Monterey Bay, and past president of the Society for Historians of American Foreign Relations.

The Invention of International Relations Theory

Realism, the Rockefeller Foundation, and the 1954 Conference on Theory

Edited by Nicolas Guilhot

"Indispensible. While this volume will be widely read, cited, and assigned within the discipline, it will also be important in American and world intellectual history and in the critical history of ideas about world organization and world politics."—Samuel Moyn, author of *Democracy Past and Future*

The 1954 Conference on Theory, sponsored by the Rockefeller Foundation, featured a "who's who" of scholars and practitioners debating what would become the foundations of international relations theory. Assembling his own team of experts, all of whom have struggled with the legacy of this conference, Nicolas Guilhot revisits a seminal event in the discipline and its odd rejection of scientific rationalism.

Far from being a spontaneous development, these essays argue, the emergence of a "realist" approach to international politics, later codified at the conference, was deliberately triggered by the Rockefeller Foundation. The organization was an early advocate of scholars who opposed the idea of a "science" of politics, pursuing, for the sake of disciplinary autonomy, a vision of politics as a pre-rational and existential dimension of the human condition. The archived conversations reproduced here for the first time, as well as unpublished papers by Hans Morgenthau, Reinhold Niebuhr, Paul Nitze, speak to this defensive stance.

NICOLAS GUILHOT is senior research associate at the Centre National de la Recherche Scientifique.

The Primacy of the Political

An Introduction to the History of Political Thought

Dick Howard

The conflict between politics and antipolitics has replayed itself throughout Western history and philosophical thought. Plato's quest for absolute certainty led him to denounce political democracy, an antipolitical position later challenged by Aristotle. This back-and-forth exchange came to a head at the time of the American and French revolutions. Through this wide-ranging narrative, Dick Howard throws new light on a recurring philosophical dilemma, proving our political problems are not as unique as we think.

Howard begins with ancient Greece and the rise and fall of republican politics in Rome. In the wake of Rome's collapse, the conflict between politics and antipolitics reemerged through the contrasting theories of Saint Augustine and Saint Thomas. During the Renaissance and the Reformation, the emergence of the modern individual again shifted the terrain. Even so, politics vs. antipolitics dominated the period, frustrating even Machiavelli, who sought to reconceptualize the nature of political thought. Hobbes and Locke, theorists of the social contract, then reenacted the conflict, which Rousseau sought (in vain) to overcome. Adam Smith and the growth of modern economic liberalism, the radicalism of the French revolution, and the conservative reaction of Edmund Burke subsequently marked the triumph of antipolitics, and the American Revolution may have offered the potential groundwork for a renewal of politics.

DICK HOWARD is distinguished professor of philosophy at the State University of New York, Stony Brook.

After Evil

A Politics of Human Rights

Robert Meister

"The rare work of a genuine thinker, one who permits no phenomenon, discourse, event, or category of analysis to be assumed or left uninterrogated. There is no question about this book's brilliance, profundity, intellectual range, and originality of argument. It makes most other contemporary political theory books pale."

—Wendy Brown, University of California, Berkeley

Contemporary human rights discourse speaks about past evils, such as the Holocaust or the Cold War, in such a way that they are committed solidly to the past. Termed "transitional" justice, this technique allows future generations to move forward, but the false assumption of closure enables those who are guilty to elude responsibility, and those who seek redress find themselves denied justice indefinitely.

This approach to history doesn't presuppose evil ends when justice begins. Rather, it assumes that the time *before* justice is the moment to put evil in the past. Merging examples from literature and history, Robert Meister confronts the problem of closure and the resolution of historical injustice. He boldly challenges the empty moral logic of "never again," or the theoretical reduction of evil to a cycle of violence and counterviolence broken down once evil is remembered for what it *was*. Meister calls out such methods for their cruelty and susceptibility to exploitation. Specifically, he follows "never again" in relation to Auschwitz and its evolution into a twenty-first-century doctrine of Responsibility to Protect.

ROBERT MEISTER is professor of social and political thought at the University of California, Santa Cruz.

Rethinking Islamophobia

Edited by Salman Sayyid and

Abdulkaroom Vakil

While the concept of "Islamophobia" has gained traction since 9/11, its meaning and implications vary widely among political, religious, and intellectual groups. Many disagree over the kind of experiences that should be viewed as Islamophobic, and they argue over the labeling of certain security measures as Islamophobic, the claim that imprisoning terrorists is an institutionalization of Islamophobia, and the belief that attacks on Muslims in Western democracies is a manifestation of Islamophobia.

International in scope, *Thinking Through Islamophobia* investigates the genesis and use of this concept in a variety of contexts. Contributors relate the phenomenon to such prejudicial practices as racism and anti-Semitism yet insist that Islamophobia is more than a polemical term relating to reactionaries and extremists. Instead, these essays lay out a legitimate framework for defining and understanding Islamophobia free from the debates that threaten to consume it. They also uniquely engage with the overlooked ways that the rights of Muslims have been challenged in countries across the world.

SALMAN SAYYID is the director of the Centre of Ethnicity and Racism Studies at the University of Leeds. He is the author of *A Fundamental Fear: Eurocentrism and the Emergence of Islamism* and coeditor of *A Postcolonial People: South Asians in Britain*.

Globalized Arts

The Entertainment Economy and Cultural Identity

J. P. Singh

"A subtle and well-honed sense of the benefits of cultural globalization while remaining sensitive to potential drawbacks. I found wisdom on every page."—Tyler Cowen, author of *Creative Destruction: How Globalization is Changing the World's Culture*

Our interactive world can take a cultural product, such as a Hollywood film, Bollywood song, or Latin American telenovela, and transform it into a source of cultural anxiety. Film, music, television, and the performing arts enter the same networks of exchange as other industries, and the anxiety they produce informs a fascinating area of study not only for art and culture but also for global politics.

Focusing on the confrontation between global politics and symbolic creative expression, J. P. Singh shows how, by integrating themselves into international markets, entertainment industries give rise to far-reaching cultural anxieties. With examples from Hollywood, Bollywood, French grand opera, Latin American television, West African music, postcolonial literature, and even the Thai sex trade, Singh cites both the attempt to address cultural discomfort and the effort to deny entertainment acts as cultural. He connects creative expression to clashes between national identities, and he details the effect of cultural policies, such as institutional patronage and economic incentives, on the making and incorporation of art into the global market. Ultimately, Singh shows how these issues impact debates on cultural trade.

The Anarchic Sea

Maritime Security in the Twenty-First Century

Dave Sloggett

Recently the sea has become the locus of international terrorism and transnational crime, with the smuggling of drugs, weapons, and people monopolizing the resources of governments and agencies. These threats have united otherwise disparate countries in the fight to secure the ocean's trade and traffic. Yet the effort to control maritime activity can also give rise to great tension and conflict, as in the fight over Spratley and Paracel Islands in the South China Sea and the Lomonosov Ridge in the Arctic Ocean. The dwindling of natural resources might also force the world's navies to battle over economically vital sea lanes—the growth of such forces across the world being one sign of imminent conflict. The development of military capacity always increases the possibility of abuse. *The Anarchic Sea* maps the terrain of modern maritime security through seven dimensions, concluding with suggestions for integrating individual components into a cohesive, more efficient protective network.

"A most timely, comprehensive, and relevant study of the challenges and considerations surrounding maritime security."—Sym Taylor, former commander, Royal Navy

DAVE SLOGGETT is a senior associate analyst working with Dryad Maritime Intelligence Service and holds visiting research posts at the Centre for Defence Studies, Kings College London, York University, and the United Kingdom Defence Academy. After Pluralism

Reimagining Religious Engagement

Edited by Courtney Bender and
Pamela E. Klassen

“The first volume to bring together scholars from a variety of fields whose work critically examines the genealogy of secularism and its relationship to pluralism, the potentially negative implications and underlying assumptions of tolerance, and the naturalized hegemony of the law vis-à-vis religion in liberal democracies. Probably the most ambitious and influential effort to map out religious pluralism in the United States.”—Nathaniel Deutsch, University of California, Santa Cruz

While acknowledging the importance of diversity, the contributors to this volume instead treat religious pluralism as historically and ideologically produced, its doctrine having embedded itself within a range of political, civic, and cultural institutions. Working comparatively across nations and disciplines, these essays explore pluralism as a “term of art” that determines the norms of identity and the parameters of exchange, encounter, and conflict. They question the assumptions and power relations underlying pluralism’s discourse and its influence on the legal decisions that have shaped modern religious practice. Having established the genealogy and effects of pluralism, contributors then generate a new set of questions for engaging the collective worlds and multiple registers in which religion operates.

Religion, the Enlightenment, and the New Global Order

Edited by John M. Owen and
J. Judd Owen

Largely because of the cultural and political shift of the Enlightenment, Western societies emerged from sectarian conflict and embraced a more religiously moderate path. In nine original essays, leading scholars ask whether the Enlightenment can quell today’s tensions between politically active religions. Contributors begin with the Enlightenment’s restructuring of the West, examining its past and future encounters with Protestant and Catholic Christianity, Judaism, Islam, and Hinduism. While strongly attuned to the difficulties of implementing the principles of the Enlightenment worldwide, these scholars ultimately believe its elements have a necessary place within the new global order. Their approach treats conflict as a means to cooperation and sees religious commitment as a bolster, instead of a detriment, to political civility. Ultimately, they collapse both the claim that the West’s experience offers a ready-made template for the world to follow and the belief that the West’s achievements are to be ignored, despised, or discarded.

The Other Cold War

Heonik Kwon

"This book is a history, not of the end of the Cold War, but of the process of its ending, both locally and globally. It is a rich and compelling account of that complex period."—Marilyn B. Young, New York University

In this conceptually bold project, Heonik Kwon uses anthropology to interrogate the Cold War's cultural and historical narratives. Adopting a truly panoramic view of local politics and international events, he challenges the notion that the Cold War was a global struggle fought uniformly around the world and that the end of the war marked a radical, universal rupture in modern history.

Incorporating comparative ethnographic study into a thorough analysis of the period, Kwon upends cherished ideas about the global and their hold on contemporary social science. His narrative describes the slow decomposition of a complex social and political order involving a number of local and culturally creative processes. While the nations of Europe and North America experienced the Cold War as a time of "long peace," postcolonial nations entered a different reality altogether, characterized by vicious civil wars and other exceptional forms of violence. Arguing that these events should be integrated into any account of the era, Kwon captures the first sociocultural portrait of the Cold War in all its subtlety and diversity.

HEONIK KWON is reader in anthropology at the London School of Economics and author of *Ghosts of War in Vietnam* and *After the Massacre: Commemoration and Consolation in Ha My and My Lai*.

The Curse of Berlin

Africa and the World After the Cold War

Adekeye Adebajo

At the 1884–1885 Conference of Berlin, a collection of states, mostly European, established the partition of Africa. The "Curse," as the conference has come to be called, is the grounding theme of Adekeye Adebajo's trenchant study, though his guiding focus is the development of Africa in the years after the Cold War.

Adebajo opens with Africa's quest for security, featuring essays on the continent's political institutions, such as the African Union and subregional bodies. He follows with chapters on the United Nations and its operations in Africa, particularly its political, peacekeeping, and socioeconomic missions. Adebajo includes two rare profiles of the secretary generals who worked with the UN from 1992 to 2006: Egypt's Boutros Boutros-Ghali and Ghana's Kofi Annan. Africa's pursuit of representative leadership informs the next section, with essays examining the hegemonic influence of South Africa, Nigeria, China, France, and the United States. Concluding chapters discuss Africa's search for unity, exploring the direct and indirect impact of Nelson Mandela, Thabo Mbeki, Kwame Nkrumah, Cecil Rhodes, Barack Obama, and Mahatma Gandhi.

"Adekeye Adebajo is one of the brightest of his generation of Africanists, and this book not only displays his deep knowledge of the continent but also his considerable flair and enthusiasm.

A must read for all scholars working on African international relations."—James Mayall, University of Cambridge

German Colonialism

Race, the Holocaust, and Postwar Germany

Edited by Volker Langbehn and
Mohammad Salama

More than half a century before the mass executions of the Holocaust, Germany devastated the peoples of southwestern Africa. While colonialism might seem marginal to German history, controversial new scholarship compares the acts of this period with Nazi practices on the Eastern and Western fronts.

Drawing on the most recent research concerning the “continuity thesis,” the chapters in this collection debate connections between German colonialist activities and the behavior of Germany during World War II. Some argue that the country’s domination of southwestern Africa gave rise to perceptions of racial difference and superiority at home, contributing to a nascent nationalism that blossomed into National Socialism and the Holocaust, while others remain skeptical about the connection. Contributors merge Germany’s colonial past with debates over the country’s identity and history and compare its colonial crimes with other European ventures. Issues discussed range from the denial or marginalization of German genocide to the place of colonialism and the Holocaust within German-Israeli postwar relations. Authors also compare the legacy of genocide in both Europe and Africa.

Mercenaries, Pirates, Bandits, and Empires

Private Violence in Historical Context

Edited by Alejandro Colás and
Bryan Mabee

“Well conceived and consistent with the growing literature on international relations’ alternative expressions and forms.”—Michael Innes, Leeds University

Incidents of private violence were once dismissed as relics of a less evolved world, but the international activities of terrorists, insurgents, private military companies, and pirates have brought the phenomenon back to global prominence. Interpreting these acts through their individual historical contexts, this collection traces the development of private violence and conducts a comparative analysis of its growth across different geographical planes. Nine comprehensive chapters recount the making of pirates, privateers, mercenaries, warlords, bandits, and smugglers—groups of men (and, occasionally, women) who commit violence outside or on the borders of state authority. Contributors sample from political anthropology and economy, historical sociology, and international relations, underscoring the way in which private violence both threatens existing social orders and empowers established political authorities. They denaturalize the idea that national states are the true, dominant actors in the global sphere, examining the contradictory yet complex interactions among nonstate violence, authority, and political mobilization.

Policing Economic Crime in Russia

From Soviet Planned Economy to Privatization

Gilles Favarel-Garrigues

Translated by Roger Leverdier

"A valuable contribution to the existing literature on crime, policing, and economic reform in late-Soviet/post-Soviet Russia."—Brian Taylor, Syracuse University

From Brezhnev to Yeltsin, Gilles Favarel-Garrigues explores the management of economic crime in Russia, recasting the history of the "criminal problem" that has tainted Russian politics since the late 1980s. In the closing decades of the Soviet regime, shortages of goods and services precipitated a rapid increase in black market and underground practices, visible to all yet wholly illegal. Favarel-Garrigues explains why certain cases were selected for prosecution and why particular funds and manpower were deployed to combat "economic crime." Law enforcement agencies were also charged with stemming the fallout from Mikhail Gorbachev's liberal economic reforms. Russia's judicial framework proved too obsolete to deal with far-reaching economic change, tempting many in law enforcement to privatize their professional know-how. Drawing on firsthand research with both criminals and policemen, Favarel-Garrigues scrupulously investigates the changing face of criminal law and its practice before and after the fall of the Soviet state.

GILLES FAVAREL-GARRIGUES is a CNRS researcher at CERI-Sciences Po, Paris, specializing in Russian law enforcement and the global drive to stop transnational crime. He serves on the editorial board of *Critique Internationale*, *Cultures and Conflicts*, and *International Political Sociology*, and is the coauthor of *Crime and States*.

Reds at the Blackboard

Communism, Civil Rights, and the New York City Teachers Union

Clarence Taylor

The New York City Teachers Union shares a deep history with the American left. Established in 1916, the union maintained an early, unofficial partnership with the American Communist Party, staffing key positions with members sympathetic to party goals. Clarence Taylor recounts this pivotal relationship and its backlash, as the union threw its support behind controversial policies and rights movements. Taylor's research reaffirms the party's close ties with the union yet, at the same time, makes clear that the organization was anything but a puppet of communist power.

Reds at the Blackboard showcases the rise of a unique type of unionism that would later dominate the organizational efforts to promote civil rights, academic freedom, and the empowerment of blacks and Latinos. Through its affiliation with the Communist Party, the union pioneered social-movement unionism, solidifying ties with labor groups, black and Latino parents, and civil rights organizations. During this period, the union established a model parent-teacher partnership that has yet to be duplicated. It also militantly fought to improve working conditions for teachers while championing broader social concerns. Taylor also recounts how anti-Semitism and McCarthyism affected the union.

CLARENCE TAYLOR is professor of history and black and Hispanic studies at Baruch College and professor of history at the Graduate Center, City University of New York. His books include *The Black Churches of Brooklyn* and *Knocking at Our Own Door: Milton A. Galamison and the Struggle to Integrate New York City Schools*.

The Gold Standard at the Turn of the Twentieth Century

Rising Powers, Global Money, and the Age of Empire

Steven Bryan

"An impressive and original work. Bryan synthesizes an enormous amount of reading on monetary and economic history and uses it to create an interesting and attractive frame for his own research. I have rarely seen the much praised ideal of transnational history so fully achieved."

—Mark Metzler, University of Texas at Austin

By the end of the nineteenth century, the world was ready to adopt the gold standard out of fealty concerns of national power, prestige, and anti-British competition. Although the gold standard allowed countries to enact a virtual single world currency, the years before World War I were not a time of unfettered liberal economics and one-world, one-market harmony. Outside of Europe, the gold standard became a tool for nationalists and protectionists interested in growing domestic industry and imperial expansion.

This overlooked trend, provocatively reassessed in Steven Bryan's well-documented history, contradicts our conception of the gold standard as a British-based system infused with English ideas, interests, and institutions. In countries like Japan and Argentina, the gold standard expanded trade and furthered the goals of the age: industry and empire. Bryan argues that these countries looked more to North America and the rest of Europe for ideological models. Not only does this history challenge our idealistic notions of the prewar period, it also reorients our understanding of what followed.

STEVEN BRYAN is an attorney in Tokyo. His next project is a comparative history of Japan in the 1920s and 1990s.

The Future of the Past in the Digital Age

Roy Rosenzweig

Introduction by Anthony Grafton

In these visionary essays, Roy Rosenzweig, pioneering historian and self-proclaimed "techno-realist," weighs the effect of new media, digital technology, and the Internet on recording, researching, and teaching history. Brokering a compromise between the "cyber-enthusiasts" who champion technological breakthroughs and the "digital-skeptics" who fear the end of humanistic scholarship, Roy Rosenzweig shows, in concrete and theoretical terms, how technology has not only democratized the discipline but also reaffirmed the place of the historian in the making of history.

Rosenzweig evaluates the tools now available to researchers and their implications for the historical record. Sources are more accessible than ever; anyone can store and display huge amounts of data; hypertext encourages innovative methods of reading and interpretation—these changes have galvanized amateur energy for history, but they have yet to eclipse the vital role of the historian. Gatekeepers of quality and truth, professional historians are more necessary than ever and must actively maintain the integrity of their work. Rosenzweig helps historians navigate the radical transformation of today's archive and the possibilities and pitfalls of reframing the past in unprecedented ways. He recommends active engagement with new technologies so audiences remain engaged, rather than alienated, by the work historians produce.

ROY ROSENZWEIG (1950–2007) was professor of history and director of the Center for History and New Media at George Mason University. He is the author of *The Presence of the Past: Popular Uses of History in American Life* and coauthor of *Who Built America?*.

The Promises of Liberty

The History and Contemporary Relevance of the Thirteenth Amendment

Edited by Alexander Tsesis

In these original essays, America's leading historians and legal scholars reassess the ratification of the Thirteenth Amendment and its contemporary relevance to issues of liberty, justice, and equality. The Thirteenth Amendment abolished slavery in the United States, reasserting the radical, egalitarian dimensions of the Constitution. It laid the foundation for future civil rights and social justice legislation, yet subsequent reinterpretation and misappropriation has curbed more substantive change. With constitutional jurisprudence undergoing a revival, *The Promises of Liberty* provides a full historical portrait of the Thirteenth Amendment and its untapped potential for ensuring common liberties.

The collection begins with Pulitzer Prize-winning historian David Brion Davis (Yale), and the failure of the Thirteenth Amendment to achieve its framers' objectives. Davis is followed by James M. McPherson (Princeton), another Pulitzer recipient, relates abolitionists to the ratification process. Subsequent essays address Lincoln's commitment to ending slavery and the Thirteenth Amendment's surprisingly small role during and after Reconstruction. The anthology's third Pulitzer Prize winner, David M. Oshinsky (University of Texas, New York University), explains how peonage undermined the prohibition against compulsory service. Other essays relate the amendment to contemporary issues in organized labor, reproductive rights, and citizenship.

Greece in Asia Minor, 1919–1922

Victoria Solomonidis

"An in-depth chronicle and analysis of the events leading up to the Asia Minor Disaster, providing a unique account of the Greek administration in Smyrna, accompanied by rich and illuminating detail."—Steven Morewood, University of Birmingham

In 1919, at the behest of the First World War allies, Greece entered Smyrna and the Vilayet of Aidin, occupying their territories until the finalization of the Ottoman peace treaty. Their stated mission was to protect Greek and other Christian communities from Turkish nationalists, but the underlying motive was a ruthless pursuit of the age-old "Great Idea," which aimed to absorb unredeemed Hellenes into the Greek kingdom. Despite a bungled military landing and other challenges, High Commissioner Aristidis Stergiadis heroically governed over this disparate population, adhering to a doctrine of peaceful coexistence. The odds, however, were overwhelmingly against him, and in September of 1922, Turkish nationalists gutted the Greek army and expelled Hellenism from Asia Minor. Victoria Solomonidis reclaims the pioneering work of the Greek administration of Smyrna, which contended with postwar allied relations, major foreign financial interests, the plight of Christian minorities in Turkey, the inexorable rise of Turkish nationalism, fraught domestic politics, and uneven developments in both military and diplomatic negotiations. Solomonidis reassesses the work and reputation of Stergiadis, a reluctant yet dedicated public servant, and challenges the view that he was responsible for the Smyrna catastrophe.

VICTORIA SOLOMONIDIS is a fellow at King's College, University of London.

Serious Play

*Desire and Authority in the Poetry of Ovid,
Chaucer, and Ariosto*

Robert W. Hanning

"Hanning's inspired lectures have brought the literature of the middle ages to life for generations of students. *Serious Play* draws on decades of scholarship to show us why three of the world's great comic poets continue to be so exciting and engaging. If you haven't had the good fortune to study Chaucer under Hanning, reading this book goes a long way in making up for the loss."

—Aravind Adiga, Booker Prize-winning author of *The White Tiger*

Through an imaginative analysis of Ovid's amatory poetry, Chaucer's dream poems and excerpts from the *Canterbury Tales*, and Ariosto's epic *Orlando Furioso*, Robert W. Hanning identifies the comic mastery that turns these poets' trenchant critique into such enlightening and disturbing fantasy. This technique, termed *serio ludere*, or serious play, is especially compelling when studied through these writers and their powerful audiences. Ovid, Chaucer, and Ariosto lived in exciting times (Augustan Rome, late-medieval London, and late-Renaissance Italy, respectively), and their unique position as outsider-insiders afforded them rare freedoms. Their work also rebelled against the "authority" of poetic influence, remaking literary convention while challenging political power.

Audience Evolution

*New Technologies and the Transformation of
Media Audiences*

Philip M. Napoli

Today's consumers access media content through a number of unprecedented and increasingly prevalent platforms, and the development and overlap of television, the Internet, and other outlets have fragmented media audiences, making the effort to reach them more complex. Building on his award-winning book, *Audience Economics*, Philip M. Napoli maps our current media landscape and its challenge to traditional conceptions of the audience. He also considers changes to audience measurement, both politically and culturally.

Napoli examines the ongoing redefinition of the industry-audience relationship by technologies that have moved the audience marketplace beyond traditional metrics. Today, media providers and audience measurement firms deploy new, more sophisticated tools to gather audience information, focusing on factors rarely considered before, such as appreciation, recall, engagement, and behavior. In doing so, the industry has tried to take advantage of new platforms as thoroughly as the consumers they hope to attract. Napoli traces the interplay between political and economic interests and their effect on audience evolution. He recounts battles between stakeholders over the assessment of media audiences and their efforts to restrict the functionality of new technologies, as well as their push to influence new measurements for television, radio, and the Internet.

PHILIP M. NAPOLI is a professor in the Graduate School of Business at Fordham University and director of the Donald McGannon Communication Research Center.

Harmony and War

Confucian Culture and Chinese Power Politics

Yuan-kang Wang

“Wang Yuan-kang offers a powerful test of strategic culture versus structural realism in the contexts of Song and Ming China, meticulously weaving together international relations theories and Chinese history. The result is a must read for any student of international relations and Chinese foreign policy.”—Victoria Tin-bor Hui, University of Notre Dame

Confucianism has shaped a certain perception of Chinese security strategy, symbolized by the defensive, nonaggressive Great Wall. Many believe China is antimilitary and reluctant to use force against its enemies. In a pathbreaking study that travels seven hundred years of Chinese history, Yuan-kang Wang resoundingly discredits this notion, recasting China as a practitioner of *realpolitik* and a ruthless purveyor of expansive grand strategies. Leaders of the Song Dynasty (960–1279) and Ming Dynasty (1368–1644) prized military force and shrewdly assessed the strength of China’s adversaries. They adopted defensive strategies only when their country was weak and pursued expansive goals, such as territorial acquisition, enemy destruction, and total military victory, when their country was strong. Despite the dominance of an antimilitarist Confucian culture, warfare was not uncommon. Grounding his research in primary sources, Wang outlines a politics of power that is crucial to China’s strategies today, especially its policy of “peaceful development,” which it has adopted only because of military, economic, and technological weakness in relation to the United States.

YUAN-KANG WANG is an assistant professor in the Department of Sociology and the School of Public Affairs and Administration at Western Michigan University.

Behind the Gate

Inventing Students in Beijing

Fabio Lanza

“Explodes the boundaries of our understanding of the critical intellectual revolution that we refer to as the ‘May Fourth Movement.’”—Madeleine Zelin, Columbia University

On Sunday, May 4, 1919, thousands of students protested the Versailles treaty in Beijing. Seventy years later, another generation demonstrated in Tiananmen Square; standing against a relief of their predecessors and therefore merging with their own mythology while consciously deploying their activism. Through an investigation of twentieth-century Chinese student protest, Fabio Lanza considers the marriage of the cultural and the political, the intellectual and the quotidian, that occurred during the May Fourth movement, along with its rearticulation in subsequent protest. Lanza revisits reform in pedagogical and learning routines, changes in daily campus life, the fluid relationship between the city and its residents, and the actions of allegedly cultural student organizations. Through a careful analysis of everyday life and urban space, he radically reconceptualizes the emergence of “worker,” “activist,” and “student” and how they anchored and informed political action. He accounts for the elements that drew students to Tiananmen and the formation of the student as an enduring political subjectivity.

“Well crafted and thought provoking. The most sophisticated attempt by a historian to reinterpret an episode that has always occupied a central place in the historiography—and in the imagination—of modern China.”—Michael Tsien, University of North Carolina at Chapel Hill

Haiku Before Haiku

From the Renga Masters to Bashō

Translated and with an introduction by
Steven D. Carter

While the rise of the charmingly simple, brilliantly evocative haiku is often associated with the seventeenth-century Japanese poet Matsuo Bashō, the form had already flourished for five hundred years before Bashō even began to write. *Hokku* is similar in syllable count and structure to haiku, though it functions differently as a genre. Whereas haiku is its own constellation of image and meaning, *hokku* opens a series of linked, collaborative stanzas in a sequence called *renga*.

Under the mastery of Bashō, *hokku* first gained its modern independence. His talents evolved the style into the haiku beloved by so many poets today—Richard Wright, Jack Kerouac, and Billy Collins being notable devotees. This anthology reproduces 300 *hokku* poems composed between the thirteenth and early eighteenth centuries, from the work of the courtier Nijō Yoshimoto to the genre's first “professional” master, Sōgi, and his subsequent disciples. It also features twenty masterpieces by Bashō himself. Stephen Carter, a renowned scholar of Japanese poetry and prominent translator, includes an introduction covering the history of haiku and the form's aesthetics and classifies these poems according to style and context—*renga*, *Haikai renga*, and *renga* from the Edo period, for example. His rich commentary and analysis illuminates each work, and he adds their romanized versions and notes on composition and setting, as well as descriptions of the poets and the times in which they wrote.

STEVEN D. CARTER is Yamato Ichihashi Chair in Japanese History and Civilization in the Department of East Asian Languages and Cultures at Stanford University. His numerous books include *Just Living: Poems by the Medieval Monk Tonna* and *Unforgotten Dreams: Poems by the Zen Monk Shotetsu*.

Workers, Globalization, and Crisis

Contributions from India to a Global Agenda for Labor

Rohini Hensman

"Hensman is careful to avoid the kind of blanket condemnation of globalization that appears in so much critical literature, and part of her originality is showing very clearly that the problems of the labor movement in India are not the result of globalization but have a much longer history."

—John Harriss, Simon Fraser University

While it's easy to blame globalization for shrinking job opportunities, dangerous declines in labor standards, and a host of related discontents, the world's "flattening" has also created unprecedented opportunities for worker organization. Using India's labor movement as a richly representative model, Rohini Hensman charts the successes and failures, strengths and weaknesses, of the struggle for workers' rights. As Indian products gain wider acceptance in global markets, disparities in pay, employment conditions, and union rights between regions such as the European Union and countries such as India are exposed, raising the issue of globalization's implications for labor. This study examines the unique pattern of "employees' unionism" that emerged in Bombay in the 1950s before considering union responses to recent developments, especially the drive to form a national federation of independent unions. A key issue is how far unions can resist protectionist impulses and press for stronger global standards, along with the mechanisms to enforce them.

ROHINI HENSMAN is a writer and independent scholar based in Bombay and the coauthor of *Beyond Multinationalism: Management Policy and Bargaining Relationships in International Companies*.

Unifying Hinduism

Philosophy and Identity in Indian Intellectual History

Andrew J. Nicholson

"This book does much more than deal with the philosophy of Vijanabhiksu. It questions in an intelligent and constructive manner the way Indian philosophy has been studied in modern scholarship—and what has been done wrong."

—Johannes Bronkhorst, University of Lausanne, Switzerland

Andrew J. Nicholson argues that although the idea of a unified Hindu identity is not as ancient as many Hindus claim, it has its roots in the innovations of South Asian philosophy from the fourteenth to seventeenth centuries. Thinkers treated the philosophies of Vedanta, Samkhya, and Yoga and the deities Visnu, Siva, and Sakti as all belonging to a single system of belief and practice—rivers leading into the ocean of Brahman, the ultimate reality.

Drawing on the work of philosophers from late-medieval Vedanta traditions, including Vijnanabhiksu, Madhava, and Madhusudana Sarasvati, Nicholson shows how thinkers portrayed Vedanta philosophy as the ultimate unifier of diverse belief systems. This late-medieval project paved the way for later visionaries, such as Vivekenanda, Radhakrishnan, and Gandhi, whose teachings promoted the idea that all world religions belonged to a single spiritual unity. Nicholson revisits monism and dualism, theism and atheism, and orthodoxy and heterodoxy, and he critiques such formulas as "the six orthodox systems" that have worked their way into modern thinking about Indian philosophy.

ANDREW J. NICHOLSON is assistant professor of Hinduism and Indian intellectual history at Stony Brook University.

Buddhist Philosophy of Language in India

Jñānaśrīmitra on Exclusion

Lawrence J. McCrea and
Parimal G. Patil

"A readable, elegant translation and introduction to a central work in a neglected area of Buddhist philosophy."—Jonathan C. Gold, Princeton University

Jñānaśrīmitra (975–1025) was regarded by both Buddhists and non-Buddhists as the most important Indian philosopher of his generation. His theory of exclusion combined a philosophy of language with a theory of conceptual content, or, in simpler terms, an investigation into the nature of our words and thoughts. His theory informed nearly all the work accomplished at Vikramaśīla, a monastic and educational complex instrumental to the development of Buddhism. His ideas were also vividly debated by the Hindu and Jain philosophers who succeeded him.

This volume marks the first English translation of Jñānaśrīmitra's *Monograph on Exclusion*, a careful, critical exploration of language, perception, and conceptual awareness. Featuring the rival arguments of Buddhist, Hindu, and other thinkers, the *Monograph* reflects more than half a millennium of hotly contested debate. Lawrence J. McCrea and Parimal G. Patil familiarize the reader with the authors, themes, and topics in the text and situate Jñānaśrīmitra's findings within his larger intellectual milieu.

LAWRENCE J. MCCREA is assistant professor of Sanskrit Studies at Cornell University.

PARIMAL G. PATIL is John L. Loeb Associate Professor of the Humanities at Harvard University.

Śakuntalā

Texts, Readings, Histories

Romila Thapar

"Through a timeless character of legend and literature, we are allowed a ringside view of our most fascinating cultural—and gendered—history."

—*India Today*

The figure of Śakuntalā appears in many forms throughout South Asian literature, most famously in the *Mahābhārata* and in Kālidāsa's fourth-century Sanskrit play, *Śakuntalā and the Ring of Recollection*. In these two texts, *Śakuntalā* undergoes a critical transformation, relinquishing her assertiveness and autonomy to become the quintessentially submissive woman, revealing much about the performance of Hindu femininity that came to dominate South Asian culture. Through a careful analysis of sections from *Śakuntalā* and their various iterations in different contexts, Romila Thapar explores the interaction between literature and history, culture and gender, that frame the development of this canonical figure and a distinct conception of female identity.

"Thapar shows how it is possible to express complex ideas, rooted in philosophy and hermeneutics, without recourse to jargon. This book is a frontrunner for the prize of the best book on Indian history."—*The Telegraph*

"As fascinating as Śakuntalā's journey is Thapar's retelling of it and her careful assumption of the role of a literary detective."—*The Hindu*

"Thapar's wide-ranging essays and monographs make a strong case for the urgency to historicize traditions and highlight the changing meanings of texts and oral cultures."—*Hindustan Times*

ROMILA THAPAR specializes in early Indian history and is professor emeritus at Jawaharlal Nehru University, New Delhi.

"Whitney Davis is a wonderful art historian with a supple mind, a feel for the broader humanities, and deep interests in philosophy, aesthetics, and psychoanalysis. He is also a scholar with a profound knowledge of the history of queer theory and gay life. These qualities and interests make him the ideal—perhaps uniquely ideal—person to write this book."—Daniel Herwitz, University of Michigan

Queer Beauty

Sexuality and Aesthetics from Winckelmann to Freud and Beyond

Whitney Davis

The pioneering work of Johann Winckelmann (1717–1768) identified a homoerotic appreciation of male beauty in classical Greek sculpture, a fascination that had endured in Western art since the Greeks. After Winckelmann, however, sometimes the value (even the possibility) of queer beauty in art was denied. Several theorists after Winckelmann, notably the philosopher Immanuel Kant, broke sexual attraction and aesthetic appreciation into separate or dueling domains. In turn, sexual desire and aesthetic pleasure conceived as discrete categories had to be profoundly rethought by later writers.

Davis argues that these disjunct domains could be re-joined by such innovative thinkers as John Addington Symonds, Michel Foucault, and Richard Wollheim, who reclaimed earlier insights about the mutual implication of sexuality and aesthetics. Addressing texts by Arthur Schopenhauer, Charles Darwin, Oscar Wilde, Vernon Lee, and Sigmund Freud, among many others, Davis criticizes modern approaches, such as Kantian idealism, Darwinism, psychoanalysis, and analytic aesthetics, for either reducing aesthetics to a question of sexuality or for removing sexuality from the aesthetic field altogether. Despite these schematic reductions, sexuality always returns to aesthetics, and aesthetic considerations always recur in sexuality. Davis particularly shows that formal philosophies of art since the late eighteenth century have had to respond to nonstandard sexuality, especially homoeroticism, and that theories of nonstandard sexuality have drawn on aesthetics in significant ways.

WHITNEY DAVIS is professor of history and theory of ancient and modern art at the University of California at Berkeley. He is the author of *A General Theory of Visual Culture* and five other books on prehistoric, ancient, and modern arts and art theory, as well as on the history and theory of sexuality.

Dialectical Passions

Negation in Postwar Art Theory

Gail Day

"A significant contribution to art theory and cultural theory in the wake of the crisis of postmodernism and the current melancholic attachment to the 'lost object' of modernist art and its incipient nihilism. Day reinvigorates the debate on dialectics and negation in order to clarify how much of this theory relies on a misunderstanding of the commodity-form of art under capitalism"—John Roberts, author of *The Intangibilities of Form: Skill and Deskilling in Art After the Readymade*

Gail Day launches a bold critique of late-twentieth-century art theory and its often reductive analysis of cultural objects. Exploring core debates in discourses on art, from the New Left to theories of "critical postmodernism" and beyond, Day counters the belief that recent tendencies in art fail to be adequately critical and challenges the political inertia that results from these conclusions. Day organizes her defense around critics who have engaged substantively with emancipatory thought and social process: T. J. Clark, Manfredo Tafuri, Fredric Jameson, Benjamin H. D. Buchloh, and Hal Foster, among others. She maps the tension between radical dialectics and left nihilism and assesses the interpretation and internalization of negation in art theory. Chapters confront the claim that exchange and equivalence have subsumed the use value of cultural objects—and with it critical distance; the meaning of symbol and allegory in 1980s art and its limited reading of the writings of Walter Benjamin and Paul de Man; and common conceptions of mediation, totality, and the politics of anticipation.

GAIL DAY is senior lecturer in the School of Fine Art, History of Art and Cultural Studies, University of Leeds.

Animal Ethics in Context

Clare Palmer

It's widely agreed that because animals feel pain we should not make them suffer gratuitously. Some ethical theories go even further: because of the capacities animals possess, they have a right not to be harmed or killed. Such views concern what *not* to do to animals, but we also face the question of what we should do to assist the ones that may be hungry or distressed. And if we do, say, feed a starving kitten, does this commit us to feeding wild animals suffering through a hard winter?

In this controversial book, Clare Palmer claims that, with respect to assisting animals, what's owed to one animal is not necessarily owed to all, even if they share similar capacities. Context and relation are crucial ethical factors. If animals live independently in the wild, their fate is none of our moral business, but if humans create dependent animals, or destroy animals' habitats, we may have special obligations to assist. Such arguments are familiar in human cases—parents have special obligations to their children, for example, or some groups owe reparations to others they have harmed. Palmer develops such relational concerns in the context of wild animals, domesticated animals, and urban scavengers, arguing that different contexts create very different moral relationships.

"An intensively researched, carefully structured intervention in ongoing debates about animals and ethics by a scholar with an impressive grasp of the literature."—Alice Crary, *The New School*

CLARE PALMER is associate professor of philosophy and environmental studies at Washington University in St. Louis. She is the author of *Environmental Ethics and Process Thinking* and editor of *Animal Rights*.

Parable and Politics in Early Islamic History

The Rashidun Caliphs

Tayeb El-Hibri

"Tayeb El-Hibri does for the Rashidun period what he did with the early Abbasid period. His basic argument, that eighth-century Islamic accounts of the Rashidun period reflect Abbasid-period concerns of political and religious legitimacy, is clear to anyone who has read the sources carefully. I find his assessment quite provocative and convincing."—James E. Lindsay, Colorado State University

The story of the succession to the Prophet Muhammad and the rise of the Rashidun Caliphate (632–661 AD) has been familiar to historians from the political histories of medieval Islam and the competing perspectives of Sunni and Shi'i Islam. While descriptive and varied, these approaches have long excluded a third reading in which the conflict over the succession to the Prophet is treated as a parable, the motives, sayings, and actions of the protagonists revealing profound links to previous texts and an irony with regard to political and religious issues. In a controversial break from previous historiography, Tayeb El-Hibri privileges the literary and artistic triumphs of the medieval Islamic chronicles and maps the origins of Islamic political and religious orthodoxy. Considering the patterns and themes of unified narratives, including the problem of defining qualification according to religious merit, nobility, and skills in government, El-Hibri offers an insightful critique of both early and contemporary Islam and the concerns of legitimacy shadowing various rulers.

TAYEB EL-HIBRI is associate professor of Near Eastern studies at the University of Massachusetts, Amherst.

The Persian Gulf and Pacific Asia

From Indifference to Interdependence

Christopher Davidson

A perfect storm of economic, diplomatic, and cultural concerns have brought about the "Asianization" of Asia, uniting the continent's many countries under a dominant framework of interests and trends. Pushing Asia's domain even further is a new and abiding relationship between Asia's three most industrialized economies and the Persian Gulf's six monarchies. What began as a basic, twentieth-century marriage of convenience, founded on the trading of hydrocarbon, has now evolved into a complex, long-term commitment guaranteeing continuous exchange of resources and need.

Christopher Davidson, an acclaimed expert on the Middle East's rapidly changing economy, details the eastern and western factors that have brought Asia and the Gulf closer together. Although this relationship has yet to include military arrangements, evidence suggests that the two regions have bolstered other noneconomic ties. Davidson unravels the confusing links between these emerging powers and shows how their unique economic, political, geographical, and cultural identities both strengthen and threaten their future partnership.

"A timely overview of the multifaceted, rapidly developing interrelationships between the GCC states and South Korea, China, and Japan."

Beyond the 'Wild Tribes'

Understanding Modern Afghanistan and Its Diaspora

Edited by Ceri Oeppen and
Angela Schlenkhoff

International and nongovernmental organizations, as well as journalists, are excellent sources of information on contemporary Afghanistan. Unfortunately, their expertise is rarely tapped by those who hope to better understand the country's phenomenal complexity. This volume draws on these perspectives to build a comprehensive portrait not only of Afghanistan itself but also of its widely dispersed peoples and cultures. Contributors cull through a wealth of research, effectively collapsing the myths and stereotypes perpetuated by nineteenth- and twentieth-century European texts. Their essays are so wide-ranging, they address everything from the causes of the country's protracted conflicts to the nature and future of its musical traditions. Anyone interested in an intimate, engaging, and uncommon encounter with an increasingly critical nation will devour this expertly-crafted collection.

"The dedicated scholar-practitioners who contribute to this book seek to locate the ills and challenges facing Afghanistan today. The issues they wrestle with are timeless (in the Afghan context), and their combined reflections and findings will have an enduring relevance."—Amalendu Mishra, Lancaster University

CERI OEPPEN earned her Ph.D. at the Sussex Centre for Migration Research, University of Sussex. Her research concerns migrant transnationalism and integration and migrants' involvement in development.

ANGELA SCHLENKHOFF earned her Ph.D. at the University of Kent, focusing on the issues of home and identity as experienced by London's Afghan population.

A Metahistory of the Clash of Civilisations

Us and Them Beyond Orientalism

Arshin Adib-Moghaddam

Beginning with the wars of ancient Persia and Greece, Arshin Adib-Moghaddam searches for the theoretical underpinnings of the "clash of civilizations" that has determined so much of our political and cultural discourse. He revisits the Crusades, colonialism, the Enlightenment, and our contemporary "war on terror," and he engages with both eastern and western thinkers, such as Adorno, Derrida, Farabi, Foucault, Hegel, Khayyam, Marcuse, Marx, Said, Ibn Sina, and Weber. His investigation explains the conceptual genesis of a clash of civilizations and the influence western and Islamic representations of the "other." He highlights the discontinuities between Islamism and the canon of Islamic philosophy, which distinguishes between "Avicennian" and "Qutbian" discourses of Islam, and he reveals how violence became inscribed in ideas of the West, especially during the Enlightenment. Expanding critical theory to include Islamic philosophy and poetry, this metahistory refuses to treat Muslims and Europeans, Americans and Arabs, and the Orient and the Occident as separate entities.

"Eloquent, powerful, incisive, and impressive, *A Metahistory of the Clash of Civilisations* is a masterly work of critical deconstruction in the finest tradition of Michel Foucault and Edward Said. For anyone wishing to better understand the current state of international politics, this book is absolutely essential."—Richard Jackson, secretary of the British International Studies Association

Robert K. Merton

Sociological Theory and the Sociology of Science

Edited by Craig Calhoun

“Calhoun and his colleagues delve into the vast depths of Robert K. Merton’s relatively unfamiliar writings, including those unpublished, and present us with an astonishingly complex and germane vision of sociological inquiry.”—Margaret R. Somers, University of Michigan

Robert K. Merton (1910–2003) was one of the most influential sociologists of the twentieth century. His reach can be felt in the study of social structure, social psychology, deviance, professions, organizations, culture, and science. Yet for all his fame, Merton is only partially understood, treated by scholars as a functional analyst when in truth his contributions transcend paradigm.

Joining twelve sociologists with major reputations in the field, Craig Calhoun launches a thorough reconsideration of Merton’s achievements and inspires a renewed engagement with sociological theory. Merton’s work addresses the challenges of integrating research and theory. It connects different fields of empirical research and speaks to the importance of overcoming the sharp divisions between allegedly pure and applied sociology. Merton realized the value of sociological methods that respect the institutional analysis of science and knowledge. By bringing together different aspects of his work in one volume, Calhoun illuminates the truly interdisciplinary—and unifying—dimensions of Merton’s approach. He also advances the intellectual agenda of an increasingly relevant area of study.

Knowledge Matters

The Public Mission of the Research University

Edited by Diana Rhoten and

Craig Calhoun

“An impressive array of international scholars who, individually and collectively, marshal a wide range of evidence around the very large puzzle of university transformation in the early twenty-first century.”

—Mitchell L. Stevens, Stanford University

Reporting from Asia, Africa, Europe, Latin America, and North America, scholars confront the realities of higher education and the future of its public and private agenda. Their perspective illuminates the trajectory of education in the twenty-first century and the continuing importance of the university’s public mission. Contributors focus on the research university and its effort to create new knowledge. They examine the implications of different administrative and policy decisions and the significance of various approaches to assessment and evaluation. Essays track the shifting relationship between public and private goods and purposes, such as whether student access should award individual achievement or function as an investment in social contribution, or whether scientific research should be treated as private intellectual property or as an open-access resource. Is it right for a university to serve the economic interests of private corporations? Instead of reducing such questions to elements of good and bad, this anthology empirically assesses how they play out in practice.

Mobilizing the Community for Better Health

What the Rest of America Can Learn from Northern Manhattan

Edited by Allan J. Formicola and Lourdes Hernández-Cordero

For the past ten years, the Northern Manhattan Community Voices Collaborative has put Columbia University and its hospitals in touch with surrounding community organizations and churches to facilitate vaccines, dental care, and nutritional improvement, along with other forms of healthcare and support. Authored by staff members from participating institutions, this collection shares the successes, failures, and obstacles of implementing such a vast and delicate program. Allan J. Formicola and Lourdes Hernández-Cordero outline the beginnings and infrastructure of the collaboration and the relationships that fueled positive outcomes. They demonstrate how grassroots solutions can mutually benefit communities and institutions.

Resolving Community Conflicts and Problems

Public Deliberation and Sustained Dialogue

Edited by Roger A. Lohmann, Jon Van Til, and Dolly Ford

Public deliberation and group discussion can strengthen civil society, even when participants share a historical animosity. Recently, scholars have begun to study the dialogue that sustains these conversations, especially its power to unite and divide. In these twenty-four essays, contributors read public exchanges and their sustained dialogue in the context of race relations, social justice, ethnic conflicts, public safety, public management, community design, and family therapy. They especially focus on the college campus and its network of organizations and actors, in which open discussion might seem like an idealistic if not foolhardy gesture but nevertheless is a crucial component of civic harmony.

ROGER A. LOHMANN is professor of social work at West Virginia University and chair of the school's Nova Institute.

Social Work and Human Rights

A Foundation for Policy and Practice Second Edition

Elisabeth Reichert

Social Work and Human Rights is a standard text underscoring the role of social work in protecting the rights of vulnerable populations, both within and outside of the United States. Through rigorous analysis, classroom exercises, and a frank discussion of the implications for practice, the volume effectively acquaints readers with the political, economic, and social dimensions of rights issues and the documents that guarantee them. New material covers international events, such as the United Nation's Millennium Project and its effort to reduce the poverty and suffering of billions worldwide. The volume now features an emphasis on cultural rights and a probing lesson in cultural relativism. It turns a critical eye toward the failure in the U.S. to address social welfare issues and to rectify policies that favor one group over another.

Disarming the Past

Transitional Justice and Ex-Combatants

Edited by Ana Cutter Patel, Pablo de Greiff,
 and Lars Waldorf

For the past twenty years, international donors have invested heavily in large-scale disarmament, demobilization, and reintegration (DDR) programs, while, at the same time, transitional justice measures have proliferated, bringing truth, justice, and reparations to those recovering from state violence and civil war. Yet DDR programs are seldom deconstructed to discover whether they truly achieve their justice-related aims. Additionally, transitional justice mechanisms rarely articulate strategies for coordinating with DDR. *Disarming the Past* examines the connections—and failures—between these two initiatives within peacebuilding contexts and evaluates future links between DDR programs and the aims of transitional justice. The outcome of a substantial research project initiated by the International Center for Transitional Justice (ICTJ), this book is crucial for anyone interested in effective interventions and enduring outcomes.

ANA CUTTER PATEL is deputy director of the International Policymakers Unit at the International Center for Transitional Justice (ICTJ) and project manager for the center’s research initiative on transitional justice and disarmament, demobilization, and reintegration. She is the author of “DDR and Transitional Justice,” a module in the United Nations’s *Integrated Disarmament, Demobilization, and Reintegration Standards*, among other publications.

Memoir of Forgetting the Capital Flowers (Miyakowasure no ki)

Jun'ichiro Tanizaki

Translated by Amy Heinrich

Foreword by Donald Keene

Jun'ichiro Tanizaki (1886–1965) was a renowned modern Japanese author and major literary figure. Though he is best known for his postwar novels, such as *The Key* (1956) and *Diary of a Mad Old Man* (1962), and prolific screenplays, Tanizaki began his writing career in 1909, publishing plays, essays, and poetry while producing novels and films. His work is characterized by a suspenseful technique incorporating both past and present realities, which creates a crackling tension between competing timeframes that can be palpable and erotic.

In 1948, Tanizaki completed a volume of poetry entitled *Memoir of Forgetting the Capital Flowers* (*Miyakowasure no ki*), heavily influenced by his wartime experiences from 1944 to 1946. Tanizaki wrote these poems as he endured the tumultuous years of the Second World War and Japan's defeat. The tanka poetic form (5-7-5-7-7), as well as the titular reference to the former Japanese capital of Kyoto, denotes a return to classical Japanese themes for the purpose of reflecting on modern issues.

Amy Heinrich's elegant English-language translation is made from a volume of *Miyakowasure no ki* that Tanizaki gave personally to Donald Keene in 1953, when the world-renowned scholar first came to study in Kyoto.

JUN'ICHIRO TANIZAKI was born to a well-off, merchant-class family in the Ningyocho area of Nihonbashi, Tokyo, and, along with Natsume Sōseki, is one of Japan's most popular novelists. Translations of his works into English include *The Key*, *Diary of a Mad Old Man*, *Naomi*, and *The Gourmet Club*.

SELLING POINTS:

- Amy Heinrich is a highly reputable and experienced translator of Japanese literature.
- While Tanizaki is well known for his novels and plays, his poetry has never before been translated into English.
- This translation admirably captures the tone of the original poems and reveals a side of Tanizaki not found in his novels or plays.
- Donald Keene, internationally renowned scholar and authority on Japanese studies, wrote the foreword. He unwittingly facilitated this translation by donating the Japanese original to the Starr East Asian Library at Columbia University.

Let the Right One In

Anne Billson

Directed by Tomas Alfredson and adapted for the screen by John Ajvide Lindqvist, the Swedish film *Låt den rätte komma in* (2008), known to American audiences as *Let the Right One In*, is the most exciting, subversive, and original horror production since the 1970s. Set in a snowy, suburban housing estate in 1980s Stockholm, the film combines supernatural elements with social realism. It features Oskar, a lonely, bullied child, and Eli, the girl next door. “Oskar, I’m not a girl,” she tells him, and she’s not kidding—she’s a vampire. Anne Billson reviews the near century of vampire cinema that preceeded this film and the legacy of (and new twists on) such classics as *Nosferatu* (1922) and *Dracula* (1931). She discusses the genre’s early flirtation with social realism in *Martin* (1977) and *Near Dark* (1987), along with its adaptation of mythology to the modern world, and she examines the changing relationship between vampires and humans, the role of the vampire’s assistant, and the enduring figure of vampires in popular culture.

Witchfinder General

Ian Cooper

Witchfinder General (1968), known as *The Conqueror Worm* in America, was directed by Michael Reeves and occupies a unique place in British cinema. The film fictionalizes the exploits of Matthew Hopkins, a prolific, real-life “witch hunter,” during the English Civil War. For critic Mark Kermode, the release was “the single most significant horror film produced in the United Kingdom in the 1960s,” while playwright Alan Bennett called it “the most persistently sadistic and rotten film I’ve ever seen.” The film is now treated as a landmark, though problematic, accomplishment, existing in a number of recut, retitled, and rescored versions. This in-depth study positions the film within the history of horror and discusses its importance as a British and heritage film. It also considers the script’s relationship to the novel by Ronald Bassett, and the iconic persona of the film’s star, Vincent Price. Ian Cooper closely reads specific scenes and explores various contexts, from the creation of the X certificate and the tradition of Hammer gothic to the influence on Ken Russell’s *The Devils* (1971) and the “torture porn” of twenty-first-century horror.

Exploring the Media

Revised Second Edition

Edited by Barbara Connell

“A wealth of well-researched and informative material. . . . I’d suggest investing in half-a-dozen copies for the library or the [media] department, and encouraging students to buy their own copy . . . and I’d like to congratulate Auteur for providing a text which offers friendly and well-presented guidance.”—PoV

In this new edition of Auteur’s highly successful introductory textbook, expert instructors and examiners revise, update, and expand key entries. *Exploring the Media* unpacks core concepts and develops students’ analytical, research, and production skills. As with the first edition, the initial section covers the major concepts of media studies—genre, narrative, representation, and audience—in various media forms and includes a new section on ethnicity. The second section evaluates (revised) case studies of television programs, computer games, films, magazines, and advertising, and adds the music industry, newspapers, and radio. The third reflects recent changes in technology, audience, and production.

BARBARA CONNELL is the subject leader for media studies at Coleg Glan Hafren, Cardiff, Wales.

Rob McInnes

“What an impressive pack! Comprehensive, rigorously underpinned with theoretical perspectives and informed debate, and extensively illustrated with detailed textual examples. Well-conceived, researched, and designed, a valuable and much-used resource.”—Jenny Grahame, English and Media Centre, London

In this new edition of the acclaimed Teacher’s Guide and Classroom Resources, Rob McInnes references films released in the past twelve months and reassesses traditional approaches to teaching the genre. The Teacher’s Guide reviews action/adventure narrative, formal conventions, issues of representation, institutional practices, and critical debates, especially those relating to propaganda and censorship. The accompanying Classroom Resources provides copiable sheets for teaching and covers key theoretical issues plus guidelines for practical tasks, such as storyboarding, producing a film trailer, and designing a movie poster.

ROB MCINNES teaches media studies in London and is the author of *Teen Movies: A Teacher’s Guide* and *Teen Movies: Classroom Resources*.

Studying British Cinema: The 1980s

Freddie Gaffney

In this new installment of Auteur's series on Studying British Cinema (volumes on the 1960s, 1990s and the 2000s now available), Freddie Gaffney recounts a decade that prompted a renaissance in British filmmaking. He selects films that underscore social, political, historical, and industrial developments. Beginning with an overview that captures the state of British cinema at the turn of the decade Gaffney explains why the 1980s marked a significant turning point in the evolution of British cinema and follows with a succession of case studies emblematic of the topics he confronts.

FREDDIE GAFFNEY is subject leader in broadcasting and screenwriting at Ravensbourne College of Art and the author of *On Screenwriting*.

International Film Guide 2010

The Definitive Annual Review of World Cinema
46th Edition

Edited by Ian Hadyn Smith

First published in 1963, the *International Film Guide* enjoys an unrivaled reputation as the industry's most authoritative and trusted resource on contemporary world cinema. Its world survey section alone covers the film output of more than 120 countries.

This 2010 edition tracks the most significant trends and advances in global cinema over the past year. With the Berlin Film Festival celebrating its sixtieth anniversary, the guide reviews the success and widespread influence of the festival on international filmmaking; and with the monumental popularity of James Cameron's *Avatar* (2009), as well as the captivating innovations of Pixar, the volume examines 3D films in depth. Essays look back on the history of 3D cinema and evaluate recent favorites, such as Pixar's Oscar-nominated *Up* (2009), against future film possibilities.

As it does each year, the *International Film Guide* will interest industry veterans, filmmakers, cinema enthusiasts, and the casual theatergoer. It summarizes all the major film festivals and markets, and in addition to popular core features, it includes a special section on prominent figures and powerbrokers. Written by expert local correspondents, the guide's critical reviews assess both feature films and documentaries and shorts. Supplementary materials are routinely updated and easily accessible at www.internationalfilmguide.com.

IAN HADYN SMITH is a London-based film writer and critic and long-time editor of the *International Film Guide*. He is the coauthor of *New Chinese Cinema: Challenging Representations*, editor of *The Cinema of China and South East Asia*, and coeditor of *Wim Wenders*, along with Wallflower Press's 24 Frames series on national and regional cinema.

Revisioning 007
James Bond and Casino Royale
 Edited by Christoph Lindner

Revisioning 007 presents original essays on the reinvention of James Bond in *Casino Royale* (2006), a film starring Daniel Craig in his first appearance as Agent 007. Treating *Casino Royale* as a case study in popular film culture and as a significant turning point in the 007 series, this book reads the interrelations among the Bond franchise, the culture industry, and recent developments in cinema, society, and world politics. Topics range from 007's masochism, voyeurism, and hyper-mobility to the film's testicular torture scene, the links between international politics and high-stakes gambling, and the new role of the secret agent.

The Cinema of India
 Edited by Lalitha Gopalan

The Cinema of India examines twenty-four landmark films, providing a novel framework for deciphering Indian film production and reception nationally and globally. The volume considers different regional cinemas; the role of studios; the place of "middle" cinema and its relationship to state subsidies; the style of popular films; the allure of stardom; the resistant style of art films; the resurgence of auteurism; and the poetics of documentary. The study discusses a range of films released over more than sixty years, including *Sant Tukaram* (1936), *Parasakthi* (1952), *Pather Panchali* (1955), *Bhuvan Shome* (1969), *Ghattashradda* (1977), and *Ram Ke Nam* (1991).

Film Authorship
Auteurs and Other Myths
 C. Paul Sellors

Few topics in the study of film produce as much controversy as authorship. Critics, historians, and theoreticians argue about the nature of authorship and question whether films even have authors at all. *Film Authorship* evaluates these debates in a rigorous and accessible manner. Generously illustrated, the book analyzes the historical development and theoretical underpinnings of the concepts of film authorship and the auteur. It then examines recent theories and reconceptualizes the topic firmly in empirical analyses of film production.

C. PAUL SELLORS is lecturer in photography and film at Napier University, Edinburgh. His essays on film theory and philosophy have appeared in *Screen*, *Film*, and *Philosophy* and *The Journal of Aesthetics and Art Criticism*.

Understanding Torture

J. Jeremy Wisniewski

Why does torture exist in a world that condemns it as immoral? What does it mean to call an act torture, and is such behavior always reprehensible? J. Jeremy Wisniewski outlines the moral parameters of a perennial practice and pays close attention to the implications for our moral psychology. He systematically exposes the weaknesses behind dominant arguments for torture and draws on analytic and continental philosophy, as well as relevant empirical literature in psychology, to explain the nature, consequences, and enduring appeal of torture in civilized society.

J. JEREMY WISNEWSKI is associate professor of philosophy at Hartwick College.

Cultural Identity and Political Ethics

Paul Gilbert

Cultural identity is increasingly invoked to support the political claims of individuals. Yet what is “cultural identity,” and how can we account for its significance? Paul Gilbert links cultural identity to the discredited theory of national character and ultimately argues it is not intrinsic to individual psychology. Nor is the concept uniform. Rather, various types emerge in response to circumstance, and their character is marked by superficial behaviors that have persuasive and aesthetic appeal. Gilbert sees cultural identity as lacking ethical significance and views its invocation as politically pernicious. He engages with Isaiah Berlin, Charles Taylor, Will Kymlicka, Jean-Paul Sartre, and Julia Kristeva.

PAUL GILBERT is emeritus professor of philosophy at the University of Hull.

Deleuze and Ethics
Daniel W. Smith and

Since he never devoted a book solely to the study of ethics, many scholars assume Gilles Deleuze chose not to write about the subject. Yet the exact opposite is true. Concepts such as ethics, values, and normativity play a crucial—if subtle and easily overlooked—role in Deleuze’s philosophical project. The essays in this volume unearth and explore the ethical dimensions of Deleuzian philosophy across a number of trajectories, ultimately reclaiming the moral and philosophical triumph of his thought.

DELEUZE CONNECTIONS

Deleuze and Political Activism

Deleuze Studies Volume 4: 2010
(Supplement)

Edited by Marcelo Svirsky

Gilles Deleuze and Félix Guattari wrote *Anti-Oedipus* to inspire dissidents and political activists to fight not by outlining a program for change but by isolating the political, cultural, and economic factors that inhibit change. As a result, their work was instantly recognized as a philosophical watershed.

Anti-Oedipus changed the landscape of political theory, and, in this volume, both critical theorists and activists recommend ways to implement Deleuze and Guattari’s critical tools into radical practice. Their essays integrate theory and case studies from different political spheres and times, offering new ways to reflect on, experiment with, and transform politics.

Deleuzian Fabulation and the Scars of History

Ronald Bogue

Ronald Bogue advances a theory of fabulation that clarifies the Deleuzian approach to literary narrative. Fabulation involves legending, becoming-other, experimenting with the real, and inventing a people to come. It relies on an understanding of time informed by Deleuze's Chronos/Aion distinction and his theory of the three passive syntheses of time. Closely reading Zakes Mda, Arundhati Roy, Roberto Bolaño, Assia Djebar, and Richard Flanagan, Bogue proves the value of fabulation as a critical tool while, at the same time, confronting the problematic relationship between history and storytelling.

Romance, History, and Propaganda, 1880–1914

Anna Vaninskaya

Community is a word we apply liberally to groups and concepts, yet its definition sparks fierce contention and debate. This was no different when Victorian and Edwardian writers, critics, historians, and political activists first coined the term. Anna Vaninskaya turns to the great polymath William Morris and his contemporaries to illuminate this history. She draws on working-class fiction, mainstream periodicals, radical newspapers, political pamphlets, anthropological treatises, autobiographies, and diaries.

The Wake of Jacques Derrida

Peggy Kamuf

Peggy Kamuf writes both *in* the wake of Derrida and *on* the wake of his death. Each of these essays is written in response to a particular context, occasion, or event. A majority analyze issues that arise in Derrida's work, from the 1960s to the posthumous publication of his teaching seminars. Three chapters deal with Derrida outside of his writing, revisiting media interviews, the film *D'aileurs Derrida* (2000), and affective relations to the U.S., and three chapters recount Kamuf's friendship with Derrida and her translation of his works. An afterword muses on the book's essential continuity over time, tone, and subject.

Theory and Practice

Judith Still

This volume marks the first full-length study of hospitality in Derridean thought. It focuses on sexual difference, which sheds light on Jacques Derrida's exploration of the complex, delicate, strange, yet familiar dance of being both good host and guest. Judith Still situates Derrida's work within the sociopolitical history of France, especially its relationship with Algeria, and the philosopher's association with other writers, most famously Hélène Cixous and Emmanuel Levinas, themselves key thinkers on hospitality.

JUDITH STILL is professor of French and critical theory at the University of Nottingham.

Benjamin Noys

"In this bold and original book, Benjamin Noys rethinks the negative in both ontology and political practice. His critical revaluations of familiar figures move in surprising new directions. They have forced me to reconsider much that I knew."
—Steven Shaviro, Wayne State University

This compelling critique contests philosophers' reliance on affirmation, especially affirmative thinking of resistance, through incisive readings of Jacques Derrida, Gilles Deleuze, Bruno Latour, Antonio Negri, and Alain Badiou.

BENJAMIN NOYS is reader in English at the University of Chichester.

Islamic banking began in the 1970s and established financial services compatible with Islamic law. Driven by market forces, it has grown rapidly in both Muslim countries and international sectors, now projected to grow at an annual rate of fifteen to twenty percent. A key factor of future growth is the availability of new products to satisfy the needs of various investors. While other texts discuss the basic principles and contracts of Islamic banking and finance, this book describes how to develop these elements into desirable financial products.

HABIB AHMED is Sharjah Chair in Islamic Law and Finance at Durham University.

**Islamic Financial Services in
Great Britain**
Elaine Housby

The first book-length study of Islamic financial services in Great Britain, this volume emphasizes how British examples of Islamic financial provision illustrate both the main characteristics of Islamic financial teaching and key issues in the lives of British Muslims. Chapters cover the history of Islamic financial provision in Great Britain, personal deposit accounts, personal finance and credit cards, home finance, investment funds and share dealing, insurance, *sukuk*, and commercial financing. All in all, a balanced and comprehensive view of a surprisingly successful practice.

ELAINE HOUSBY gained her Ph.D. at the Open University, where she researched of Islamic financial traditions in contemporary Britain.

Young British Muslims *Identity, Culture, Politics, and the Media*

Nahid Afrose Kabir

The 7/7 London bombings created a new, highly politicized atmosphere in Britain, especially for the country's young Muslims. *Young British Muslims* constructs a portrait of contemporary British Muslim identity through topics such as migration, settlement, religion, culture, socioeconomic status, and wider social environments. Nahid Afrose Kabir has conducted ethnographic fieldwork with more than two hundred young Muslims from five British cities: London, Leicester, Bradford, Leeds, and Cardiff. Her careful analysis and revealing interviews offer insight into the hopes and aspirations of British Muslims, and her impeccable reproduction of their testimonies represents a remarkable range of ethnicities: Algerian, Bangladeshi, Indian, Iranian, Iraqi, Kenyan, Libyan, Mauritian, Moroccan, Pakistani, Palestinian, Somali, Sudanese, Syrian, Yemeni, and English and Scottish converts.

NAHID AFROSE KABIR is a visiting fellow at the Center for Middle Eastern Studies at Harvard University.

Islamic Conversion and Christian Resistance on the Early Modern Stage

Jane Hwang Degenhardt

Jane Hwang Degenhardt investigates the specter of Christian conversion to Islam, which served as a major plot development in early modern British drama. Degenhardt considers how East-West power dynamics informed representations of identity, embodiment, and race, and identifies dramatic treatments of religious conversion as a form of sexual seduction. She also demonstrates how Christian resistance to conversion re-empowered Catholic models during Protestant reform and critically reads Shakespeare, Marlowe, Webster, and Dekker.

JANE HWANG DEGENHARDT is assistant professor of English at the University of Massachusetts, Amherst.

Explorations into Arab Folk Literature

Pierre Cachia

European Orientalists hoped to map the character and achievements of Arab-Islamic civilization by acquainting themselves with classical Arabic and the writings of pre-fifteenth-century Arab thinkers and scholars. Regrettably, they did not take folk literature into account. Pierre Cachia builds his study from the historical, textual, social, and cultural implications of this tradition, and follows a standardized transcription system based on pronunciation rather than spelling. Including two original essays, this collection captures the full texture and style of Arab folk literature.

PIERRE CACHIA is professor emeritus of Arabic language and literature at Columbia University.

Beckett and Germany

Journal of Beckett Studies Volume
19, Number 2

Edited by Mark Nixon and
Dirk van Hulle

A lover of German literature and aspiring art critic, Beckett traveled across Germany during an extremely tumultuous and dangerous period in the country's history. This book assesses the author's relationship with German literature, art, and philosophy and recounts the country's reception of his work. It presents a complete chronology of Beckett's journey, which lasted from 1936 to 1937, and describes his attitudes toward German romanticism from both literary and philosophical perspectives. As to the German reception of Beckett's work, Theodor W. Adorno's *Versuch, das Endspiel zu verstehen* played a central role. This volume translates and interprets Adorno's notes on *Fin de partie* and *L'Innommable*, which comment on the direction of Beckett's *Endspiel*, and recounts Beckett's relationship with the television and radio station Süddeutscher Rundfunk (SDR).

MARK NIXON is lecturer in twentieth-century English literature, University of Reading, and **DIRK VAN HULLE** is associate professor of literature in English, University of Antwerp.

Demented Particulars
The Annotated Murphy

C. J. Ackerley

Demented Particulars introduces Samuel Beckett's first published novel, *Murphy*, which speaks to so much of the master's later works. The volume opens with an extensive introduction outlining the composition and publishing history of the novel and follows with critical reception and literary, philosophical, theological, and biographical influences. It also includes a sophisticated discussion of the "Cartesian catastrophe" that lies at the center of the novel's comic cosmos and an extensive bibliography of pertinent works, along with a thematic index.

C. J. ACKERLEY is professor of English at the University of Otago and coeditor of the *Journal of Beckett Studies*.

Obscure Locks, Simple Keys
The Annotated Watt

C. J. Ackerley

Obscure Locks, Simple Keys is a comprehensive study of Samuel Beckett's most enigmatic text, *Watt*. Chris Ackerley's approach extensively reads the novel's different editions and manuscripts (including the French translation, overseen by Beckett himself). A long introduction engages with the complex history of the book's making. One appendix deals with textual changes and errata in major editions of the novel, and the other confronts the novel's tangled evolution.

C. J. ACKERLEY is professor of English at the University of Otago and coeditor of the *Journal of Beckett Studies*.

In Lady Audley's Shadow

Mary Elizabeth Braddon and
Victorian Literary Genres

Saverio Tomaiuolo

Written by Mary Elizabeth Braddon in 1862, *Lady Audley's Secret* is an early pulp detective novel that was wildly successful (and highly condemned) in its day. It has also never gone out of print. Reclaiming the significance of this overlooked text, Saverio Tomaiuolo connects the novel to Victorian literature's three main genres: the Gothic, the detective, and the realistic. Through an analysis of narrative, ideology, and culture, he shows how Braddon's manipulation of Victorian literary convention sets her apart from other sensational writers and reaffirms her role in the nineteenth-century literary scene.

SAVERIO TOMAIUOLO is lecturer in English literature and language at Cassino University, Italy.

Blasted Literature

Victorian Political Fiction and the
Shock of Modernism

Deaglán Ó Donghaile

Turning to late Victorian "dynamite novels" (or fiction that portrays terrorism), as well as radical journalism and modernist writing, *Blasted Literature* proves the centrality of terrorism within the literary imagination of 1880 to 1915. During this period, a range of writers exploited the sensational draw of terrorist plotlines. Mapping the political and aesthetic links between "shilling shockers" and the triumphs of modernism, Deaglán Ó Donghaile reads the relationship between late-nineteenth-century popular fiction and twentieth-century modernism as a process of synthesis and exchange.

Circulating Genius

John Middleton Murry, Katherine
Mansfield, and D. H. Lawrence

Sydney Janet Kaplan

Sydney Janet Kaplan builds a literary biography around the personal lives of John Middleton Murry, Katherine Mansfield, and D. H. Lawrence, and recounts their relationship with other prominent modernists, including T. S. Eliot, Virginia Woolf, Lady Ottoline Morrell, Mark Gertler, and Henri Gaudier-Brzeska. Kaplan reconsiders Murry, once known as "the best-hated man of letters," as a skilled "circulator" of ideas and reputations and prompts a renewed discussion of the concept of genius, the question of the personal, the influence of psychoanalysis, and the rationale of twentieth-century confessionalism.

Literature of the 1980s

After the Watershed
Volume Nine

Joseph Brooker

The 1980s were a time of tumultuous transition in Britain. The Cold War was ending, and Margaret Thatcher's government was reinventing the post-war consensus of the British social landscape. This wide-ranging study follows the effect of these developments across fiction, poetry, and drama, as well as other cultural forms, such as television, film, and music. It maps changes in society while also paying close attention to literary forms and textures that, by the end of the decade, left Britain a very different place. Specifically, the volume describes the impact of a new generation of London novelists and the influence of feminism, postmodernism, literary theory, working-class reactions to Thatcherism, black British writing, and reflexive and self-conscious modes of writing. Writers discussed include Martin Amis, Ian McEwan, Angela Carter, Jeanette Winterson, Salman Rushdie, James Kelman, Fred D'Aguiar, Grace Nichols, and Alan Hollinghurst.

Rhythm in Literature After the Crisis in Verse

Paragraph Volume 33, Number 2

Edited by Peter Dayan and David Evans

Before the *crise de vers* diagnosed by Stéphane Mallarmé in the 1880s, musical rhythms concerned note values and repeated patterns, and literary rhythms were ascertained through metrical verse. Outlining a theory that can measure rhythms as they exist outside of patterned convention, this volume considers the work of the post-crisis writers Paul Valéry and Virginia Woolf and the Dadaists. It also reads Russian verse under communism and the writings of Jacques Réda, Julio Cortázar, and John Wilkinson.

The Romantic Predicament

Paul de Man

Edited by Martin McQuillan

The first collection of Paul de Man's essays to follow his posthumous *Aesthetic Ideology*, this anthology reproduces the author's critical engagement with Stéphane Mallarmé, Stefan George, Jean-Jacques Rousseau, Jacques Derrida, John Keats, and the symbolists. Crucial to any analysis of romantic and post-romantic poetry, these essays demonstrate the impressive range of de Man's influences and thought. Each piece acts as a foil to other texts within de Man's oeuvre. A remarkable concentration of his work on the ideology of romanticism, *The Romantic Predicament* identifies for the first time the historical problem of the complexity of thought and the difficulty of poetic consciousness, vividly realized through the extreme linguistics of de Man's chosen poets.

MARTIN MCQUILLAN is professor of literary theory at Kingston University.

Prosaic Desires

Modernist Knowing, Boredom, Laughter, and Anticipation

Sara Crangle

Exploring a variety of everyday human longings as they arise in modernist fiction, this book poses a direct challenge to psychoanalytic accounts that characterize desire as sexual or powerful. Using continental philosophy as its framework, *Prosaic Desires* contends that human longing is as endless in kind as it is in manifestation. It reads Schopenhauer, Nietzsche, and Heidegger, but relies primarily on the thinking of Emmanuel Levinas, who radically argues that the self is defined by an endless longing for the other. Authors include Joyce, Woolf, Stein, and Beckett, all of whom engage with other-based, evanescent longings.

SARA CRANGLE is a lecturer at the University of Sussex.

Scottish Women's Gothic and Fantastic Writing

Fiction Since 1978

Monica Germanà

Monica Germanà investigates the prevalence of supernatural motifs (ghosts, doubles, witches, magical journeys) in contemporary Western culture and offers the first study of Scottish women's fantasy writing in the late-twentieth and early-twenty-first centuries. She examines the supernatural device of being reborn and provides a comprehensive survey of nonrealistic fiction since 1978. She tackles Muriel Spark, A. L. Kennedy (*So I Am Glad*), Alice Thomson (*Justine*), and Ali Smith (*Hotel World*), unveiling a new canon that engages with feminism and postmodernism.

Transgressive and darkly brilliant, the drama of John Webster has long been celebrated as one of the crowning glories of the English Renaissance. The American Short Story Since 1950

Kasia Boddy

The American Short Story Since 1950 reassesses a critically underrated genre during a particularly rich period in literary history. The volume reads some of America's greatest postwar writers, who found in the form a supreme outlet for their literary and stylistic talents. Flannery O'Connor, Eudora Welty, J. D. Salinger, John Cheever, Donald Barthelme, Grace Paley, Raymond Carver, Lorrie Moore, Tim O'Brien, Denis Johnson, Junot Díaz, Sherman Alexie, Jhumpa Lahiri, David Bezmozgis, Edward P. Jones, David Foster Wallace, Gish Jen, and Lydia Davis are all covered. Kasia Boddy describes the literary cultures in which these authors wrote, the magazines in which they published; the prizes they sought; the education they received, and their (often disappointing) sales figures.

KASIA BODDY is a lecturer in English at University College London.

Alison Lumsden studies Scott's complex and evolving skepticism toward the communicative capacities of language. This is a theme that runs throughout his writing, and Lumsden brings the scholarship of the Edinburgh Edition of the Waverley Novels to bear on a critical framework grounded in post-structuralist theory. She reexamines this skepticism within the historical context of Scottish Enlightenment thought and recent developments in literary theory.

ALISON LUMSDEN is senior lecturer in the School of Language and Literature and codirector of the Walter Scott Research Centre at the University of Aberdeen. She is the editor of four volumes of the Edinburgh Edition of the Waverley Novels and the recently re-discovered *Reliquiae Trotcosiensis*.

Selected Poems by Robert Burns in Chinese Translation

Edited by Natascha Gentz

The University of Edinburgh's Confucius Institute for Scotland is proud to present the only bilingual, Chinese-to-Scottish collector's edition of Robert Burns's poems. The volume contains eleven well-known poems in English, including "I love My Jean," "My Love Is Like a Red, Red Rose," and "John Anderson, My Jo," matched with facing-page Chinese translations. The translations, completed in the 1920s by Su Manshu, Wu Fangji, and Liu Pu, finely capture the lyricism of Burns's elegant and enduring verse. Each poem is accompanied by a gorgeous page of Chinese calligraphy, contributed by Chi Zhang, a renowned Chinese calligraphy and brush painting artist based at the University of Edinburgh.

Badiou and Cinema

Alex Ling

Alex Ling seizes upon the philosophy of Alain Badiou to clarify a central question in film scholarship: can cinema be thought? Ling begins by reevaluating common conceptions of cinema, primarily through an ontological investigation of cinema's fundamental nature and purpose. He then explores whether cinema can think for itself—that is, whether it's truly “artistic”—and concludes with the consequences of a “thinking” cinema for viewers and filmmakers.

Ling rereads well-known films, from *Hiroshima Mon Amour* (1959) and *Vertigo* (1958) to *The Matrix* (1999), illustrating how Badiou's philosophy works in practice.

Bollywood in the Age of New Media

The Geo-Televisual Aesthetic

Anustup Basu

Focusing on the phenomenal output of popular Indian cinema between 1991 and 2004, Anustup Basu considers the influence of globalization, new media, and metropolitan Hindu fundamentalism on the rise of Bollywood. Beginning in the early nineties, popular Hindi cinema evolved a spectacular style inspired by liberalizing trends and the inauguration of a global media ecology. Films increasingly transformed bodies, fashions, lifestyles, commodities, gadgets, and spaces, often without any obligation to narrative. The unbounded flow of desire, affect, and aspiration transcended the limits of story and milieu. *Haqeeqat* (1995) features poor, working-class characters, but through the magic of music and dance, these downtrodden souls become transported to the streets of Switzerland. Basu calls this cinematic-cultural ecology the “geo-televisual aesthetic” and connects it to the uneven processes of globalization.

This textbook focuses on the tension created among linguistic structure, social structure and identity, and social and linguistic perception. It discusses classic variationist literature and the assertions made by more recent work based in non-English and non-European contexts. It also links the study of variation and change to broader linguistic theories and considers how they account for variation. Are English dialects disappearing under the pressure of globalization and a preference for “Estuary English”—a dialect widely spoken in the country’s southeast region—or are the geographical differences of Britain as vibrant and resilient as ever? Joan Beal considers recent research on regional variation in England and reevaluates the evidence for “dialect leveling,” ultimately demonstrating that despite such trends, distinct dialects still operate as clear and vivid markers of regional and local identity.

Modern Diachronic Corpus-Assisted Discourse Studies

Corpora Volume 5.2

Edited by Alan Partington

This text conducts a corpus linguistic study of grammatical developments over time, along with variations in lexical and phrasal preferences. It contains a collection of papers on the SiBol corpora, which examines British broadsheet newspapers from 1993 to 2005. They compare two sets of corpora using keyword analyses and targeted searches of such terms as moral, ethics, and science. Papers are drawn from Corpus-Assisted Discourse Studies (CADS), which combine a quantitative, statistical approach with a more qualitative method typical of discourse analysis. Through such corpora, the authors study changes in newspaper prose style and shifting relationships between newspapers and their readerships—and overall changes in language—over long periods. They also perform various forms of content analysis, examining new and older attitudes toward social, cultural, and political phenomena.

ALAN PARTINGTON is associate professor of linguistics at the University of Bologna.

This groundbreaking collection is the first to map the relationship between Scottish literature and postcolonial studies. Despite Scottish involvement in the British Empire, the advent of devolution together with the development of Scottish literature has encouraged critics to reread Scottish texts in a postcolonial light. This collection compares Scottish writing to the works of postcolonial countries, proves the value of the postcolonial approach to Scottish literary studies, and reveals the challenges that Scottish literature poses to debates in postcolonialism.

Richard Oram

Richard Oram balances a traditional historiographical focus on the “feudalization” of Scottish society and its wholesale importation of alien cultural traditions with an emphasis on the continuing vitality and centrality of twelfth- and early-thirteenth-century Gaelic culture. Part 1 explores the transition from the Gaelic kingship of Alba to the hybridized medieval state. Part 2 considers society and culture, following the growth of Scottish economic structures, changes in the management of land-based resources, and the exercise of secular power.

RICHARD ORAM is professor of medieval and environmental history at the University of Stirling.

History of the Scottish Parliament

Parliament in Context, 1235-1707
(Volume 3)

Edited by Keith M. Brown
and Alan R. MacDonald

The third in Edinburgh University Press’s History of the Scottish Parliament series, this volume revisits the development of parliament via new materials now available at the Records of the Parliaments of Scotland. Keith M. Brown and Alan R. MacDonald gather established and upcoming scholars, each of whom develop a theme central to parliament’s six centuries of history. Roland Tanner and Gillian MacIntosh investigate the relationship between parliament and the crown; Roland Tanner and Kirsty MacAllister discuss interactions between parliament and the church; Keith Brown follows parliament and the nobility; and Alan MacDonald examines parliament and the burghs. Other chapters follow shifting political cultures and their relationship with the law, political ideas, and social control. A concluding chapter surveys parliamentary procedures.

KEITH M. BROWN is professor of Scottish history, University of St. Andrews.

ALAN R. MACDONALD is a lecturer in history, University of Dundee.

PHILOSOPHY/SCOTTISH STUDIES

A History of Everyday Life in Medieval Scotland

Edited by Edward Cowan
and Lizanne Henderson

This collection recounts the daily behaviors, experiences, and beliefs of the Scottish people from early times to 1600. Contributors establish the character of everyday life in Scotland as it developed over time and within specific contexts. Despite focusing on the mundane, the authors also heed the experience of war, famine, environmental disaster, and other disturbances, assessing long-term processes of change in religion, politics, and economic and social affairs. In showing how the extraordinary impinged on the everyday, this book draws on every possible kind of evidence, including a diverse range of documentary sources; artifactual, environmental, and archaeological materials; and the published work of many disciplines. Contributors respect a variety of Scottish voices and reveal the nature of daily life across rank, class, gender, age, religion, and ethnicity.

EDWARD J. COWAN is professor of Scottish history at the University of Glasgow.

LIZANNE HENDERSON is lecturer in history at the University of Dundee.

The Edinburgh History of
the Greeks, ca. 500–1050
The Early Middle Ages

Florin Curta

Florin Curta writes an absorbing account of the social, economic, and political factors of Greek life between 500 and 1050 C.E. His approach relies on archaeological evidence and information gleaned from coins and seals, fiscal documents, medieval chronicles, and hagiographic literature. Several themes connect his chapters: the Balkan context, the social role of the army, and the onset of economic growth. Special attention is paid to the size of the economy in early medieval Greece, and both social and economic aspects are treated as fundamentally overlapping spheres of activity.

FLORIN CURTA is associate professor of medieval history and archaeology at the University of Florida.

Essays in Criminal Law in Honour of Sir Gerald Gordon

James Chalmers,
Fiona Leverick, and
Lindsay Farmer

The essays in this volume honor the work of Sir Gerald Gordon, the most significant figure in Scottish criminal law of the twentieth-century. Through his groundbreaking work *The Criminal Law of Scotland*, now in its third edition, along with his many academic and professional contributions, Gordon's influence on Scottish criminal law is unparalleled, reflected in the range of topics covered in this volume. Chapters address a variety of subjects of contemporary interest and cover both substantive and procedural criminal law. Contributors are practitioners and academics working within and outside of Scotland, demonstrating the extensive reach of Gordon's work.

JAMES CHALMERS is a senior lecturer in law at the University of Edinburgh.

African American Studies

Edited by Jeanette R. Davidson

African American Studies introduces the discipline's rich area of inquiry and scholarship. It reproduces foundational content, demonstrates the inextricable link between social activism and community service within African American studies, and facilitates an understanding of related global perspectives. A comparative analysis highlights connections and disparities between black studies within the United Kingdom and the United States, and topics covered include African aesthetics; African American visual culture; African American womanist literature and theory; and African American religion and philosophy.

JEANETTE R. DAVIDSON is director of the African and African American studies program at the University of Oklahoma.

The Nation and Nationalism in Europe

An Introduction

Pawel Karolewski and Andrzej Suszycki

This book explores contending approaches to nation and nationalism in Europe, including the issue of civic versus ethnic nationalism and attempts to overcome it. It also introduces three types of nationalism: ideology, social movement, and attitude, systematically treating sub-state and central-state nationalism. In conclusion, the text unpacks European nationalism in practice, through in-depth, single-country cases and cross-country comparisons in Britain, Bulgaria, Denmark, Germany, Italy, Latvia, Poland, and Sweden.

PAWEŁ KAROLEWSKI is adjunct professor of political science, University of Potsdam. **ANDRZEJ SUSZYCKI** is a senior lecturer in international politics, Humboldt University.

Active Citizenship

What It Could Achieve and How

Edited by Bernard Crick and Andrew Lockyer

Contributors consider the possibilities for active citizenship within areas of broad concern in U.K. politics: youth and justice, parliaments, women and equality, immigration, multiculturalism, schools, community, social inclusion, poverty, Europe, nationalisms, and Britishness. Each chapter considers the social and political consequences of a U.K. citizen culture and how this reality can be achieved.

SIR BERNARD CRICK (1929–2008) was professor emeritus of politics at Birkbeck College, honorary fellow in politics at the University of Edinburgh, and Stevenson Professor of Citizenship at the University of Glasgow. Crick's numerous books include *In Defence of Politics*; *George Orwell: A Life*; *Essays on Politics and Literature*; *Essays on Citizenship*; and *Democracy: A Short Introduction*.

ANDREW LOCKYER is professor of citizenship and social theory at the University of Glasgow. His publications include *Juvenile Justice in Scotland*; *Education for Democratic Citizenship*; and *Youth Justice and Child Protection*.

Daxue and Zhongyong

Bilingual Edition

Translated and Edited by Ian Johnston and Wang Ping

For eight hundred years, scholars have regarded the *Daxue* and the *Zhongyong* as essential, stand-alone critical studies of Confucian doctrine. Yet, in their original forms, these texts were part of a larger work, the *Li Ji* (*Classic of Rites*). This forty-chapter opus was promoted by the Song neo-Confucian scholar Zhu Xi, who extracted the *Daxue* and *Zhongyong* as separate texts. Translated and edited by Ian Johnston and Wang Ping, this volume contains a version and translation of the *Daxue* and *Zhongyong* as they appeared in the *Li Ji*, with annotations by the second-century Han scholar Zheng Xuan and the seventh-century Confucian classicist Kong Yingda. It also reproduces the reorganized and reinterpreted versions disseminated by Zhu Xi.

IAN JOHNSTON has just released a complete translation and annotation of the classical philosophical treatise *The Mozi*. His published work concerns the later Mohists, and he has completed two translations of early Chinese poetry.

WANG PING is lecturer in the School of Languages and Linguistics at the University of New South Wales.

International Poetry Nights in Hong Kong, 2009
(with DVD)

Edited by Gilbert C. F. Fong, Bei Dao, and Shelby K. Y. Chan

This anthology features poems by Bei Dao, Luljeta Lleshanaku, Gary Snyder, and eleven other internationally renowned poets hailing from Albania, Egypt, Germany, Japan, Mexico, the United States, mainland China, Taiwan, and Hong Kong. In 2009, these artists assembled for International Poetry Nights in Hong Kong—the first such gathering to occur in the territory's history. The works in this volume, selected by the poets themselves, are published in their original language as well as in Chinese and English. Included is a DVD sharing the remarkable events of this encounter and the backgrounds of the poets who participated.

GILBERT C. F. FONG is an adjunct professor of translation at the Chinese University of Hong Kong.

BEI DAO is one of China's most celebrated poets. His poetry collections include *Unlock*, *At the Sky's Edge: Poems, 1991-1996*, *Landscape Over Zero*, and *Forms of Distance*, and his work has been translated into more than twenty-five languages.

A Step Towards the Unknown

A Memoir

Charles K. Kao

Charles K. Kao was awarded the Nobel Prize in physics for “groundbreaking achievements concerning the transmission of light in fibers for optical communication.” This memoir chronicles his personal and scientific odyssey from an unfathomable childhood in war-torn Shanghai to seminal work with glass fibers. Kao shares his experiences as vice chancellor of the Chinese University of Hong Kong and muses on his legacy as the “father of fiber optics.” His groundbreaking research (based in part on the discovery that signal loss in fiber cables was a direct result of glass impurities rather than technology flaws) laid the groundwork for our present day communication infrastructure.

Born in Shanghai in 1933, **CHARLES K. KAO** moved to Hong Kong in 1948, eventually joining the staff at the Chinese University of Hong Kong. He founded the university's Department of Electronics (later the Department of Electronic Engineering) in 1970 and taught for many years before serving as vice chancellor. He has won many awards and distinctions.

Hong Kong Taxation

Law and Practice, 2010–2011

Garry Laird and Ayesha Macpherson

Hong Kong Taxation: Law and Practice, 2010–2011 is a comprehensive yet practical guide to the Hong Kong tax system. The volume explains the three main types of taxes in Hong Kong: property tax, salaries tax, and profits tax, and details all information relating to administration, assessment, and collection. Written clearly and accessibly with real-life examples and case studies, this popular resource continues to set the standard for up-to-date information on Hong Kong taxation law. This new edition covers taxation changes up to July of 2010.

GARRY LAIRD is a senior tax advisor with KPMG. Prior to working with KPMG, Laird was a tax specialist with the Australian Taxation Office and the Inland Revenue Department in Hong Kong.

AYESHA MACPHERSON is the partner in charge of tax services at Hong Kong SAR, KPMG China. She began her work with KPMG in London before joining its Hong Kong offices in 1993. She is a member of the Hong Kong Institute of Certified Public Accountants and the Institute of Chartered Accountants in England and Wales. She is also the chairperson of the Taxation Committee of the Hong Kong Institute of Certified Public Accountants.

Photographs of Margaret Bourke-White

Edited by Katalin Kádár Lynn

Text by Károly Szerencsés, Katalin Kádár Lynn, and Peter Strausz

Katalin Kádár Lynn's recently discovered trove of Margaret Bourke-White's mostly unpublished photographs were taken during the artist's month-long trip to Hungary in 1938. The celebrated photojournalist shot riveting portraits of Hungary's full political leadership right before the outbreak of war. From photos of Admiral Nicolas Horthy to Ferenc Szálasi, these images reveal Bourke-White's skills as a master portraitist and the implied thoughts and attitudes of major figures as they faced a monumental juncture in history.

This volume enriches Bourke-White's photos with contextualizing essays by prominent historian Károly Szerencsés, speculating on Bourke-White's impressions as she visited Hungary for the first time. Her work speaks to the sadness, treachery, inevitability, and disappointment felt by a nation on the brink of war. A short biography and a brief history of modern Hungary round out the volume.

KATALIN KÁDÁR LYNN is a historian specializing in the United States, Central and East Europe during World War II, and the Cold War. She also serves as trustee of the American Hungarian Library and Historical Society of New York City.

KÁROLY SZERENCSÉS is an associate professor in the New and Contemporary Hungarian History Department, Eötvös Loránd University, Budapest.

Hungarian-Soviet Relations, 1920–1941

Attila Kolontári

Interwar relations between Hungary and the Soviet Union did not determine the subsequent fate of Europe. In fact, the two countries failed to maintain diplomatic contact for most of the period. Yet an examination of Hungarian-Soviet relations from the end of the First World War to the beginning of the Second World War provides some important revelations.

Hungary, which emerged from the First World War as a vulnerable losing power, and Soviet Russia, recovering from severe economic and social upset, proceeded down divergent paths during these decades. Hungary achieved some of its revisionist objectives between 1938 and 1940; nevertheless, the country did not determine the direction of Europe's political developments. The Soviet Union regained Great Power status, albeit in altered form, and, beginning with the intensification of political tensions within Europe during the 1930s, steadily increased its authority, placing the USSR with Germany as one of the continent's supreme military powers. Moscow increasingly focused its attention on central Europe, treating some neighboring countries as being within its sphere of interest, but did Soviet leaders regard Hungary as part of this domain as well? Attila Kolontári attempts to answer this question while expanding our understanding of these events.

ATTILA KOLONTÁRI is assistant professor of history at the University of Kaposvár, Hungary. His research concerns Hungarian-Soviet relations, Soviet foreign policy between the two world wars, and the history of white Russian emigration in Hungary.

The Memory of the Habsburg Empire in German, Austrian, and Hungarian Right-Wing Historiography and Political Thinking, 1918–1941

Gergely Romsics

Reproducing the political and historiographical debates surrounding the legacy of the Habsburg Empire, this book follows the transformation of historico-political thinking during the two world wars. The change begins in Germany, where *völkish* streams of the Conservative Revolution offered a radical new interpretation of history. These readings focused on the unchanging essence of the *Volk* and treated a certain idea of the Habsburg past as inorganic, “derailing” history and conflicting with the true calling of the German people.

The *völkish* movement and its historiography both inspired and challenged Austrian and Hungarian intellectuals, asking them to either adopt or resist this new philosophy and the politics it represented. Building a history out of the realignment of German thought and its affect on small states within the country’s cultural orbit, this volume inventively captures the clash between domestic tradition and imported “innovation.”

GERGELY ROMSICS is a research fellow at the Hungarian Institute of International Affairs.

Balkan Cultural Legacies

Historical, Literary, and Fine Arts Perceptions

Edited by Jelena Milojković-Djurić

The land, people, and history of the Balkan Peninsula have often attracted the attention of foreign historians and writers. Yet a lack of research in primary sources and an absence of critical evaluations of Serbian, Bosnian, and Croatian histories undermines the credibility of such work.

This collection, penned by eminent historians, examines Balkan cultural legacies in a variety of contexts. They combine approaches from history, literature, fine arts, and architecture, and address issues crucial to the cultural identities of the Balkans and Serbs. Topics range from the activities of the Middle Ages to the early disintegration of Yugoslavia. Contributors focus on the question of territory and people and their geographical proximity. They examine commonalities among language, history, and cultural legacies, and revise conceptions of nationalism and ethnicity through an exploration of historical records and the political borders of state sovereignty.

JELENA MILOJKOVIC-DJURIC is the author of numerous works on Balkan culture, including *Tradition and Avant-garde: The Arts in Serbian Culture Between the Two World Wars*; *Panslavism and National Identity in the Balkans, 1830–1880: Images of the Self and Other*; *The Eastern Question and the Voices of Reason: Austria-Hungary, Russia, and the Balkan States, 1875–1908*; and *Aspects of Balkan Culture: Social, Political, and Literary Perceptions*.

György Gyarmati and Tibor Valuch chronicle the significant years between the end of the Second World War and the game-changing events of 1989. During the so-called Rákosi Era, the Communist Party strictly controlled the operation of government and society. Yet everything changed with the revolution of 1956. The authors follow these developments in depth and pay considerable attention to the Kádár Era (1957–1989) and the affect of “Hungarian Socialism.”

GYÖRGY GYARMATI is chief director of the State Security Services Historical Archives. His primary research concerns Hungarian political and social history in the second half of the twentieth century.

TIBOR VALUCH is senior researcher at the Institute for the History of the 1956 Hungary Revolution. He specializes in twentieth-century Hungarian social and cultural history.

ELECTRONIC BOOKS —E-BOOKS

New titles now available in electronic editions are listed in this catalog with price and ISBN information designated "e-book." Hundreds of backlist titles are also available. Currently e-books are available only to libraries and institutions through select vendors—NetLibrary, Blackwell Book Services, Baker & Taylor, Follett Library Resources, and others. Please contact these vendors or the sales manager for more information.
